Product overview

Gilet Tattico Cross Draw Molle Vest Verde Oliva is a military-style tactical vest designed for

operators, law enforcement, and military surplus users who need modular load carriage and fast access to gear. It combines durable materials with multiple pouch options for patrols, range use, or training.

Definition: this is a cordura and nylon cross-draw MOLLE vest with dedicated magazine pouches, a universal holster area, and a rear pocket for hydration or plate insertion.

Main features

Built for durability and modularity, the vest organizes ammunition, radios, and small tools while remaining adjustable for different body sizes.

- **Durable materials:** constructed from cordura and nylon for long service life.
- **Right-side AR magazine pouches:** three bellows-style magazine pouches for AR 70/90 or M16 with velcro closures.
- **Left-side holster and mags:** universal holster with an attached magazine carrier, removable by velcro and swappable with two additional mag pouches.
- **Chest storage:** general chest pocket with velcro flap and a detachable five-cell ammo pouch.
- **Pistol mags and compass:** three pistol magazine pouches on the left side with an overlying compass pocket.
- **MOLLE-compatible back:** rear panel crossed by three plus six sewn MOLLE-compatible webbing straps for additional pouches.
- **Adjustment and quick release:** height adjustment by velcro, side nylon straps for fit, and a three-point quick-release belt.

How to use / When it’s useful

Quick answer: use this vest when you need organized, fast access to weapons, magazines, and small tools during patrols, training, or duty tasks. It is suited to tactical, military surplus, and police applications where modularity matters.

In most cases, position the magazines and holster on the side that matches your dominant hand, adjust height with the rear velcro and tighten the side straps for a secure fit. The rear pocket accepts hydration systems or kevlar plates when required; check fit before use.

Care and notes

Simple care keeps the vest functional and long-lasting; follow basic cleaning and inspection steps and check attachments before each use.

- Hand wash or gentle machine cycle in cold water; air dry only to preserve cordura and nylon.
- Inspect velcro, webbing, and sewn MOLLE straps regularly for wear or loose stitching.

- When using ballistic plates or hydration bladders, verify proper fit and secure installation.
- Warning: the vest alone does not provide ballistic protection unless appropriate plates are installed.

FAQ

Q: Is the vest adjustable for different body sizes?

A: Yes. Height is adjustable via rear velcro and the sides use nylon straps to fit a range of body sizes and layering options.

Q: Is it compatible with other MOLLE accessories?

A: Yes. The rear panel features sewn webbing compatible with MOLLE, allowing you to add pouches and modular gear.

Q: What materials are used?

A: The vest is made from cordura and nylon, chosen for abrasion resistance and durability in field use.

Q: Does the vest include a pistol holster?

A: Yes. It includes a universal holster with a magazine carrier that is removable by velcro and can be replaced with additional mag pouches.

Q: Can I add a hydration system or ballistic plates?

A: Yes. There is a dorsal compartment designed to accept hydration bladders or kevlar ballistic plates. Always confirm the correct plate size and secure fit before use.

Q: How should I maintain the vest?

A: Clean by hand or gentle machine wash in cold water and air dry. Regularly check velcro, stitching, and webbing for wear and replace parts as needed.

Tip: Choose the variant and fit that match your carry setup (dominant-hand draw, magazine count, and plate/hydration needs) and browse related tactical and military surplus items to complete your kit.
