Product short description:

The Giaccone Parka ECWS Woodland Camo is a rugged, weather-resistant parka designed for outdoor activities and everyday use. Ideal for hikers, field workers and military-surplus enthusiasts seeking reliable protection with a classic woodland camouflage look.

- **Material:** Made from high-quality materials for durability and weather resistance.
- **Protection:** Wind- and rain-resistant construction helps keep you warm and dry in variable conditions.
- **Design:** Woodland camouflage pattern for a bold, tactical appearance.
- **Fit:** Functional pockets and an adjustable fit for practical storage and freedom of movement.

Product description:

Product overview

The Giaccone Parka ECWS Woodland Camo is a durable, functional parka designed for military operators, tactical personnel, outdoor enthusiasts, hunters and police duty use. It combines

waterproof protection, thermal insulation and multiple pockets to support long hours in wet, cold or demanding environments.

Definition: a laminated nylon camouflage parka with a removable thermal liner, designed for protection and practical field use.

Main features

Built for durability and field functionality, the parka balances weather protection with ventilation and storage for mission- or trip-critical items.

- **Outer fabric:** 100% laminated nylon — breathable, water-resistant and abrasion-resistant for extended use.
- **Hood with visor:** fixed hood featuring a visor to help keep rain and wind off the face.
- **Elbow reinforcements:** reinforced panels on high-wear areas to extend garment life.
- **Adjustable Velcro cuffs:** customize sleeve fit to block wind and retain warmth.
- **Rank flap:** front press-stud flap for displaying rank or identification.
- **Pockets:** two large front pockets, two right-sleeve pockets with Velcro closures and a Velcro Italy shield panel, plus an internal chest document pocket.
- **Closure & ventilation:** double-slider front zipper for easy access and controlled ventilation, plus sleeve ventilation zippers.
- **Thermal liner:** removable olive-woodland pile liner for adjustable insulation across seasons.

How to use / When it's useful

Quick answer: wear this parka for wet, windy or cold conditions when you need durable protection, storage and variable insulation. Use the removable liner and sleeve vents to adapt to changing activity levels and temperatures.

In most cases, the parka is suitable for field operations, hunting, long hikes, camping and police duty where weather resistance and cargo capacity matter. Layer under the parka in very cold weather and remove the pile liner or open vents during high-exertion tasks to avoid overheating.

Care and notes

Keep the parka working well by following the garment care instructions and using closures properly before storage or cleaning.

- Detachable pile liner: remove when not needed and follow the care label for washing or drying.
- Fasten zippers and Velcro before laundering to protect fabric and closures.
- Avoid bleach and high-heat drying unless the care label allows it.
- Use sleeve ventilation zippers to manage heat during heavy activity and prevent excessive

sweating.

FAQ

Q: Is the Giaccone Parka Woodland Camo waterproof?

A: The laminated nylon outer fabric is water-resistant and designed to keep the wearer dry in rain and snow. Breathability helps manage internal moisture.

Q: Is the thermal pile liner removable?

A: Yes. The olive pile liner unzips from the parka so you can remove it for warmer weather or when you need a lighter jacket.

Q: What pockets does the parka have?

A: Two large front pockets, two right-sleeve pockets with Velcro (plus a Velcro Italy shield panel) and an internal chest document pocket for secure storage.

Q: Is this parka only for military use?

A: No. It is suitable for military and tactical users but also for civilians using it for hunting, hiking, camping or police duty where rugged, weatherproof outerwear is needed.

Q: How do I prevent overheating while wearing the parka?

A: Use the double-slider front zipper and sleeve ventilation zippers to increase airflow. Removing the pile liner also reduces insulation during high-activity periods.

Q: How do I choose the right size?

A: Measure chest, waist and hips with a tape measure and compare your values to the size chart provided. Allow room for layers to maintain mobility and warmth.

Tip: Choose the size that allows for comfortable layering and check the detachable liner option for seasonal use. Browse related tactical and military surplus outerwear to match your mission or outdoor needs.
