Product features:

Product short description:

O Positive blood (0+) is one of the most common and versatile blood types. It is relevant for donors and for hospitals that need reliable supplies for emergency, surgical and routine transfusion use.

- **Type:** O Positive (0+).
- **Compatibility:** O+ red blood cells can be transfused to all Rh-positive recipients (O+, A+, B+, AB+), making O+ donors especially useful when Rh-negative units are not required.
- **Use:** Employed in transfusions, elective and emergency surgeries, trauma care and to maintain hospital reserves.
- **Note:** Donation and transfusion follow local blood bank protocols; always adhere to testing and screening procedures.

Product description:

Product overview

This is a 3D rubber identification patch showing blood type 0 Positive, designed for military, tactical, rescue, and police use. It is intended for anyone who needs a compact, visible way to

display their blood group on uniforms or gear.

Definition: a 0 Positive blood type ID patch is a small, velcro-backed rubber label that attaches to velcro-compatible clothing or equipment. Size: 4.5 x 2.5 cm. Color: green. Material: durable rubber with rear velcro.

Main features

Simple, durable design that fits on camouflage, tactical vests, jackets, and other velcro-ready items.

- **Durable rubber:** Made from high-quality rubber for wear resistance.
- **Rear velcro:** Easy to attach and remove from velcro panels on uniforms and gear.
- **Compact size:** 4.5 x 2.5 cm — small but legible.
- **3D design and color:** Raised lettering and green color for clear visibility.
- **Versatile use:** Suitable for tactical, military surplus, rescue, sport, and police applications.

How to use / When it’s useful

Quick answer: Attach the patch to any velcro-compatible area on your uniform, plate carrier, backpack, or jacket. It stays visible and is easy to remove when needed.

In most cases, this patch is useful during field operations, training, events, or emergencies where first responders or medics need immediate blood type information. It is a practical accessory for duty, tactical, and everyday carry setups.

Care and notes

Maintain the patch by keeping the velcro free of lint and avoid prolonged exposure to harsh chemicals. Follow these simple care tips:

- Remove the patch before machine washing garments to protect both patch and velcro.
- Resists moisture and rain, but avoid prolonged submersion to preserve adhesion and rubber life.
- Keep velcro clean to ensure a secure hold on gear and clothing.
- For best night visibility, use a light source; the patch is not a reflective or glow-in-the-dark product.

FAQ

Q: Is the patch waterproof?

A: The rubber patch resists moisture and rain, but it is not designed for continuous submersion. Dry and reattach after heavy soaking to maintain the velcro hold.

Q: Will the velcro keep the patch securely in place?

A: Yes, the patch uses a strong velcro backing suitable for standard velcro panels on uniforms and tactical gear. Check and clean the velcro periodically for the best grip.

Q: Can I add other information to the patch?

A: This item is sold with the fixed 0 Positive blood type marking only. We do not offer custom text or additional markings for this specific model.

Q: Can I wash clothes with the patch attached?

A: It is recommended to remove the patch before machine washing to prolong both the patch and garment life and to protect the velcro.

Q: Is the patch visible at night?

A: The green color and 3D design improve daytime visibility. For low-light or night conditions, use an external light source as the patch is not reflective.

Q: What size is the patch and where will it work?

A: The patch measures 4.5 x 2.5 cm and fits any velcro-compatible surface such as camouflage uniforms, tactical vests, backpacks, and jackets commonly used in military surplus, tactical, and police gear.

Tip: Choose the right variant for your uniform and check that your gear has a velcro panel before ordering. Browse related tactical and military surplus ID patches to match colors and styles for a coordinated setup.
