Product features:

Product short description:

AB Negative (AB-) is a rare blood group for donors and recipients. Representing less than 1% of the global population, AB- has a specific role in transfusion medicine. If you are an AB- donor, your plasma donations are particularly valuable and can help many patients. Support awareness and responsible blood donation.

- **Type:** AB Negative (AB-)
- **Rarity:** Less than 1% of the world population
- **Compatibility:** Can receive red blood cells from other Rh-negative types
- **Donation value:** Plasma from AB donors can be used for recipients of any blood type
- **Purpose:** Promote awareness and encourage blood donation
