- **Diet:** Compatible with a varied, balanced diet and an overall balanced approach to wellness.
- **Note:** Informational only — not a substitute for medical advice. Consult a healthcare professional for personal guidance.

Product description:

Product overview

This is a 3D rubber blood type identification patch for tactical and military use, showing the blood group B Positive. It is designed for service members, first responders, police, and outdoor enthusiasts who need a clear, quick visual ID in emergency situations. Definition: a small, hook-

and-loop backed rubber patch that displays the blood group B+ for attachment to camouflage uniforms or gear.

Compact and low-profile, the patch combines durable materials and clear 3D lettering for immediate recognition on uniforms, load carriers, or backpacks. It fits into tactical, military surplus, and police gear setups where reliable medical identification matters.

Main features

Essential features that make this blood type patch practical for field and duty use:

- **Material:** Durable rubber construction for long-lasting use and resistance to outdoor conditions.
- **3D design:** Raised lettering and symbols for fast, legible identification.
- **Rear hook-and-loop (velcro):** Secure attachment that allows easy removal and repositioning.
- **Compact size:** 4.5 x 2.5 cm — compact enough to be unobtrusive but readable at a glance.
- **Color:** Green camouflage tone to match most uniform and tactical color schemes.
- **Water resistance:** Rubber material withstands moisture and light rain conditions.

How to use / When it’s useful

Quick answer: Attach the patch to any loop-field area on your uniform, plate carrier, or pack where it is clearly visible. In most cases, it should be placed on the chest or upper arm for fastest recognition by medics and teammates.

The patch is useful during training, field operations, patrols, and recreational activities where medical information may need to be accessed quickly. It is suitable for tactical, police, and military surplus setups, as well as search and rescue or outdoor duty gear.

Care and notes

Basic care keeps the patch readable and secure without special tools or treatments:

- Clean with a damp cloth; avoid strong solvents or abrasive cleaners.
- Allow to dry after exposure to rain or sweat before storing with other gear.
- Velcro is high quality and built for repeated attachment and removal.
- Designed for identification use only; not a substitute for medical records or devices.

FAQ

Q: Is the patch waterproof?

A: The patch is made of water-resistant rubber and holds up to moisture and light rain, but it is

not a sealed, submersible device.

Q: Will the rear velcro wear out quickly?

A: The velcro is high quality and designed for repeated use. Normal attachment and removal during duty should not cause rapid wear.

Q: Can I add other personal details to the patch?

A: This specific item is sold only as the B Positive blood type patch and is not available with additional custom text or symbols.

Q: Will the green color match my uniform?

A: The green camouflage tone is intended to blend with most military and tactical uniform patterns while remaining legible.

Q: What are the exact dimensions?

A: The patch measures 4.5 x 2.5 cm, compact for mounting on chest panels, sleeves, or packs.

Q: How long does delivery take?

A: Typical shipping is within 3–5 business days, depending on your location and stock availability.

Tip: Make sure you select the correct blood group variant for your needs and check related tactical patches and ID accessories to complete your kit. Browse complementary items like hook-and-loop panels or medical ID patches for a coordinated setup.
