Product short description:

The Giacca Utility Camo Jacket Impermeabile SBB is a versatile camouflage utility jacket for outdoor activities and casual urban wear. Ideal for hikers, travelers and anyone who wants practical, weather-ready outerwear.

- **Material:** Durable, high-quality fabric with water-resistant properties to help keep you dry.
- **Protection:** Designed to shield against wind and light rain while maintaining comfort in varied conditions.
- **Pockets:** Multiple pockets provide practical storage for essentials on hikes, trips or daily use.
- **Style:** Camouflage pattern with an urban tactical look for functional everyday wear.

Product description:

Product overview

The SBB Utility Camo Jacket is a lightweight, water-repellent camo jacket designed for outdoor enthusiasts, hikers, tactical users and duty or police personnel who need practical weather

protection. It combines a coated polyester shell, breathable mesh lining and heat-sealed seams to protect against rain and damp conditions.

Definition: A coated polyester outer layer with Oeko-Tex certification, internal anti-condensation treatment and taped seams to balance water resistance, breathability and low weight. The design is suitable for tactical, military surplus style use and everyday duty wear.

Main features

Built for practical use, the jacket focuses on weather protection, comfort and easy carry. Key features include:

- **Material:** 100% coated polyester with Oeko-Tex certification for skin-safe materials.
- **Breathability:** Anti-condensation treatment and inner mesh lining to reduce sweat build-up.
- **Seams:** Heat-sealed seams to limit water entry at joints.
- **Pockets & closures:** Two lower front zip pockets and a water-resistant front zipper.
- **Visibility:** Reflective rear strip for low-light safety.
- **Adjustability:** Hook-and-loop adjustable cuffs and an internal elastic drawcord at the waist.
- **Packable & light:** Ergonomic cut, low bulk and easy to stow in a backpack.

How to use / When it’s useful

The jacket is ideal for hiking, evening runs, travel and on-duty situations where a light weather shell is needed. Use it as an outer layer over base layers or as an over-jacket on cool, wet days.

Quick answer: Use this jacket for rainy or windy conditions where breathability and low weight matter. In most cases, choose your usual size; if you plan to wear thick layers underneath, consider ordering one size up for comfort.

Care and notes

Simple care keeps the jacket performing and extends its life—follow these basic instructions and avoid harsh treatments.

- Wash by hand or in a washing machine on a gentle cycle at 30°C.
- Do not use bleach or fabric softeners; these can damage the coating and treatments.
- Air dry away from direct heat sources; do not tumble dry or iron the coated surface.
- Store in a dry, ventilated place to avoid mildew or damage to the coating.

FAQ

Q: Is the jacket fully waterproof?

A: The jacket is highly water-resistant thanks to its coated polyester and heat-sealed seams. It

offers strong protection in rain and damp conditions but is not rated for prolonged immersion.

Q: Can I wear this jacket year-round?

A: Yes. It works well across seasons as a lightweight shell. In cold weather, wear it over insulating layers or a thermal mid-layer for added warmth.

Q: How do I choose the right size?

A: Use chest, jacket length and sleeve length measurements to select size. If you wear layers under the jacket, consider one size larger for a comfortable fit.

Q: Is the jacket suitable for tactical or duty use?

A: The jacket’s low profile, camo design and practical features make it suitable for tactical, military surplus style and duty applications where a lightweight weather shell is needed.

Q: How easy is the jacket to carry while traveling?

A: Very easy—its lightweight construction and low bulk make it simple to fold into a backpack or luggage for travel and outdoor activities.

Q: Any special maintenance tips to preserve water resistance?

A: Avoid bleach and fabric softeners, wash gently at 30°C, and air dry. Reproofing sprays for coated fabrics may be used if water repellency decreases over time—follow product instructions carefully.

Tip: When ordering, check chest and sleeve measurements and consider your layering needs to pick the right size. Browse similar tactical and duty outer layers to compare features and find the best match for your activities.
