Product features:

Product short description:

B Negative blood type profile for donors and patients. B- is a rare blood group (around 2% of the global population) and plays a key role in emergency transfusions.

- **Type:** B Negative (B-) blood group.
- **Rarity:** Approximately 2% of people worldwide have B Negative blood.
- **Compatibility:** Red blood cells from B Negative donors can be given to B and AB recipients, both Rh-negative and Rh-positive.
- **Why donate:** B Negative donors help maintain vital blood supplies and can save lives in urgent situations.

Product description:

Product overview

This is a 3D rubber identification patch showing the blood group B Negative, designed for Velcro-compatible uniforms and gear. It is aimed at military, tactical users, police, first responders, and anyone who wants a visible, durable blood-type ID on duty or in the field.

Definition: a small Velcro-backed rubber patch that displays the blood group (B Negative) for quick visual identification.

Main features

Compact and durable patch that attaches quickly to Velcro panels on camouflage, tactical vests, and packs.

- **Material:** Durable green rubber for long wear and easy cleaning.
- **Attachment:** Strong Velcro backing for quick, secure placement on compatible surfaces.
- **Size:** 4.5 x 2.5 cm — compact and discreet but readable.
- **Design:** 3D raised lettering for clear visibility.
- **Compatibility:** Color and shape chosen to blend with most camouflage and military surplus gear.

How to use / When it’s useful

Quick answer: attach the patch to any Velcro-compatible panel on your uniform, plate carrier, backpack, or jacket for immediate visibility. In most cases, placing it on the chest or shoulder gives fastest recognition during an emergency.

Use it daily on duty, during training, or in outdoor operations to keep your blood type visible to medics and team members. The patch is suited for tactical, police, and field use where quick identification can help responders.

Care and notes

Simple care keeps the patch effective and the Velcro reliable.

- Wipe clean with mild soap and water; avoid harsh chemicals.
- Check Velcro attachment regularly and remove accumulated debris to maintain grip.
- Not a medical device: use alongside official medical ID if required.
- Color chosen for broad camouflage compatibility, but visibility may vary with specific patterns.

FAQ

Q: What are the patch dimensions?

A: The patch measures 4.5 x 2.5 cm. It is intended to be compact yet readable on most Velcro panels.

Q: Is the Velcro backing durable?

A: Yes, the product uses a quality Velcro backing designed for secure hold on Velcro-compatible uniforms, vests, and packs. Periodic cleaning of the hook side will keep the bond strong.

Q: Will the green color match my camouflage?

A: The green was selected to be compatible with most military and tactical camouflage patterns. However, exact match and visibility can vary by fabric and pattern.

Q: Is the patch weather-resistant?

A: The rubber construction resists moisture and normal outdoor wear. Clean with mild soap and water; avoid solvents or abrasive cleaners to preserve the finish.

Q: Can I get this patch for other blood groups?

A: Currently this listing is for the B Negative variant. Check product options or the store catalog for other blood-group patches if available.

Q: Is this a substitute for official medical identification?

A: No. The patch provides quick visual information but is not a medical device. Carry official medical ID or documentation where required.

Tip: When ordering, confirm the correct blood-group variant and check available product options; browse related tactical and military surplus ID patches and accessories to complete your kit.
