Product short description:

The Vega Holster CCH 800 Concealment Holster is a polymer holster designed for discreet, secure everyday carry. Ideal for users who need reliable retention and fast access while keeping their firearm concealed.

- **Material:** Durable polymer construction provides strength and low weight for daily use.
- **Use:** Intended for concealed carry; keeps the weapon hidden yet readily accessible.
- **Retention:** Adjustable retention system ensures a secure hold and controlled, quick access.
- **Comfort & Fit:** Ergonomic shape offers comfortable all-day wear and adapts to various clothing styles.

Product description:

Product overview

The Concealment CCH 800 polymer holster by Vega Holster is a low-profile carry solution for users who need a secure, discreet way to carry a pistol: suitable for concealed carry, duty backup, plainclothes police, and tactical use. Definition: this is an injection-molded polymer concealment holster designed for secure retention and quick access.

It features an adjustable retention screw, a double-friction clip, a full-front closure option and a belt-loop that allows cant adjustment. Compatible with Beretta 92/98/A1 and Glock 17/18/19/22/23, it mounts on all Vega Holster passants and kits and is available in Black, Green and TAN Coyote.

Main features

Compact, durable and adaptable for different carry setups—this holster balances protection and concealment for tactical, duty and everyday carry situations.

- **Injection-molded polymer:** durable and lightweight construction for long service life.
- **Adjustable retention screw:** set the draw tension to your preference.
- **Double-friction clip:** secure attachment to belt or waistband to reduce unwanted movement.
- **Full-front closure option:** front cover protects the firearm from dust and debris.
- **Adjustable belt loop/cant:** tilt and fit the holster to different belts and carry angles.
- **Detachable lower section:** lower part releases with an index-finger motion for faster access when required.
- **Model compatibility:** fits Beretta 92/98/A1 and Glock 17/18/19/22/23 and fits Vega Holster passants and kits.

How to use / When it’s useful

Quick answer: use the CCH 800 for concealed carry or as a low-profile duty holster when you need secure retention and easy access. Mount it on your belt, adjust the cant with the belt loop, and set the retention screw to match draw preference.

In most cases, the double-friction clip keeps the holster stable during movement and the full-front closure protects the weapon in dusty environments. It is especially useful for plainclothes officers, security personnel, or anyone looking for a tactical/duty-style concealment holster that fits common Beretta and Glock models.

Care and notes

Basic care keeps the holster reliable and consistent over time. Follow these simple guidelines:

- Wipe clean with a damp cloth; avoid harsh chemicals that might degrade polymer.
- Check and tighten the retention screw periodically to maintain desired tension.
- Confirm fit with your specific pistol model before regular use.

- Follow standard firearm safety rules when mounting, adjusting or holstering a weapon.

FAQ

Q: Which pistol models are compatible?

A: The holster is compatible with Beretta 92/98/A1 and Glock 17/18/19/22/23 models as stated. Always verify fit with your specific firearm before daily carry.

Q: Is the retention adjustable?

A: Yes. The holster includes a retention screw allowing you to increase or decrease draw tension for a secure yet accessible hold.

Q: What colors are available?

A: Available colors are Black, Green and TAN Coyote. Choose the color that best matches your uniform or concealment needs.

Q: Can I mount this on other Vega Holster kits?

A: Yes. The CCH 800 is designed to mount on all Vega Holster passants and kits for flexible setup and accessory compatibility.

Q: What is the clip system like?

A: The clip uses a double-friction system to hold the holster firmly to belts or waistbands, reducing unwanted movement during activity.

Q: How does the detachable lower section work?

A: The lower part of the holster is released by a controlled index-finger motion, providing quicker access when configured that way. Practice draws safely to ensure consistent operation.

Tip: Choose the color and configuration that match your carry style and confirm compatibility with your pistol model before purchase; check related concealment and tactical belt options to create a complete carry setup.
