Product short description:

The JKR 8 x 21 binoculars are a compact, lightweight option for hikers, sports spectators and outdoor enthusiasts who need a portable, reliable pair for day trips and events.

- **Model:** JKR 8 x 21 compact binoculars.
- **Magnification:** 8x magnification with 21 mm objective lenses for detailed viewing while remaining compact.
- **Optics:** Delivers sharp, bright images suitable for nature observation and sporting events.
- **Design:** Ergonomic, non-slip exterior for a secure, comfortable grip on the move.
- **Durability:** Robust construction for regular outdoor use; lightweight for easy transport.

Product description:

Product overview

The JKR 8 x 21 binocular is a compact, lightweight optic designed for outdoor use by hikers, birdwatchers and casual tactical or duty users. It delivers 8x magnification in a small, easy-to-carry package.

Definition: a compact 8x21 binocular with coated lenses and a plastic body for everyday outdoor observation. It is suitable for hiking, nature watching and general duty use where lightweight optics are preferred.

Main features

Reliable basic optics and a durable, lightweight build make this binocular a practical choice for many outdoor activities.

- **8x magnification, 21 mm objective:** Close-up view with a small, portable footprint.
- **Relative brightness 6.3 and exit pupil 2.7 mm:** Provides clear images in moderate light conditions.
- **Field of view 131 m / 1000 m (7.3°):** Wide enough to track moving subjects without frequent repositioning.
- **Anti-reflective lens coating:** Improves light transmission and reduces glare for higher contrast images.
- **Plastic body, lightweight (~200 g):** Easy to carry for long walks and travel.
- **Optical construction 2x5E/4G:** Manufacturer specification for lens/prism layout.

How to use / When it’s useful

Quick answer: use the JKR 8 x 21 for daytime terrestrial observation—birding, hiking, nature watching, and general outdoor duties. Its compact size makes it convenient to carry in a pack or on a belt.

In most cases, this binocular is not the best choice for low-light astronomy or long-range surveillance; a larger objective diameter is recommended for those uses. Adjust the central focus for sharp images and use the included protective case when not in use.

Care and notes

Basic care will keep the binocular performing well and extend its service life.

- Wipe lenses with a soft, lint-free cloth and use lens cleaner if needed.
- Do not immerse in water; the unit is splash-resistant but not fully waterproof.
- Store in the provided case to protect from dust and impacts.
- Avoid dropping or heavy impact to preserve optical alignment and plastic housing.

FAQ

Q: Is the JKR 8 x 21 waterproof?

A: The binocular is splash-resistant, suitable for light rain or moist conditions. It is not fully waterproof and should not be submerged.

Q: Can I use it for astronomy?

A: It can be used for casual sky viewing, but the 21 mm objective limits low-light performance. For astronomy, a binocular with a larger objective is recommended.

Q: Does the binocular come with a case?

A: Yes, the JKR 8 x 21 is supplied with a protective carrying case for transport and storage.

Q: How much does it weigh?

A: The binocular weighs about 200 grams, making it lightweight and easy to carry on hikes or patrols.

Q: Are the lenses anti-reflective?

A: Yes, the lenses have an anti-reflective coating to improve light transmission and reduce glare for clearer images.

Q: Is this binocular suitable for tactical or police use?

A: It is suitable for light tactical or duty tasks where compactness and portability are priorities. It is not a certified professional tactical optic and may not meet specific agency standards.

Tip: Choose the right optic size for your main use—pick compact models like the JKR 8 x 21 for hiking and casual duty, or larger objectives for low-light and astronomy; also check related binoculars and accessories to complete your kit.
