Product short description:

Umarex CO2 gas cartridge for airsoft pistols. Designed for hobbyists, sport shooters and skirmish players who need a dependable power source for CO2-equipped handguns.

- **Type:** CO2 gas cartridge manufactured by Umarex for use with airsoft pistols.
- **Use:** Powers CO2-equipped airsoft pistols for range practice, target shooting and recreational play.
- **Compatibility:** Suitable for Umarex CO2 models and other pistols designed to accept CO2 cartridges—check your model before use.
- **Handling:** New, factory-sealed canister; store in a cool, dry place and follow all safety instructions supplied with the cartridge and your airsoft pistol.

Product description:

Product overview

The Umarex CO2 Cartridge for airsoft pistols is a 12-gram disposable gas cartridge designed for airsoft players and tactical training users who need reliable, consistent power. Definition: a 12 g

CO2 cartridge that supplies gas to CO2-powered airsoft pistols.

This cartridge delivers steady pressure for sport shooting, skirmishes and duty-style drills. It is suitable for recreational and tactical use, including military surplus and police-simulation training scenarios where CO2-powered pistols are used.

Main features

Key features at a glance:

- **12 g CO2 capacity:** Standard 12-gram fill for most CO2 airsoft pistols.
- **High-pressure performance:** Designed to give consistent power shot after shot.
- **Wide compatibility:** Works with the majority of CO2-powered airsoft pistols—check your pistol manual for confirmation.
- **Single-use cartridge:** Disposable cartridge—replace when empty.
- **Built with safety in mind:** Made from quality materials and subjected to routine safety checks.
- **Easy to install:** Quick insertion lets you return to the field fast.

How to use / When it’s useful

Quick answer: insert the 12 g CO2 cartridge into your pistol or magazine according to the firearm or pistol manufacturer’s instructions, then engage the cartridge puncture mechanism. Always follow the steps in your pistol manual for correct installation.

In most cases, a 12 g cartridge will provide many shots but total shot count varies by pistol model, firing mode and ambient temperature. Use these cartridges for target practice, skirmishes, tactical training and scenarios where consistent CO2 power is needed.

Care and notes

Basic safety and handling notes to keep your cartridges in good condition:

- Do not open the cartridge or attempt to modify it.
- Do not throw into fire; do not expose to temperatures above 50 °C (122 °F).
- Store in a cool, dry place and keep out of reach of children.
- Transport safely and follow any local rules for carrying pressurized gas cartridges.
- Dispose of empty cartridges according to local regulations—do not attempt to refill.

FAQ

Q: How long does one 12 g CO2 cartridge last?

A: It depends on the pistol model, firing mode and ambient temperature. Many users report

several dozen to several hundred shots per cartridge under typical conditions.

Q: Is the Umarex cartridge compatible with my airsoft pistol?

A: The cartridge is compatible with most CO2-powered airsoft pistols. Check your pistol manual or manufacturer specifications to confirm compatibility before use.

Q: Is it safe to carry CO2 cartridges?

A: Yes, if you follow safety instructions: do not open, do not expose to temperatures above 50 °C, and avoid impact or fire. Follow local transport rules for pressurized gas.

Q: How do I install the cartridge in my pistol?

A: Installation varies by model. Generally insert the cartridge into the pistol or magazine chamber and follow the pistol manufacturer's steps to puncture and secure it. Always perform installation with the muzzle pointed in a safe direction.

Q: Can I refill or reuse the cartridge?

A: No. These 12 g CO2 cartridges are single-use and must be replaced once depleted. Do not attempt to refill them.

Q: How should I dispose of an empty cartridge?

A: Ensure the cartridge is fully empty, then dispose of it according to local waste and recycling regulations. Many areas accept empty metal cartridges for recycling—check local guidance.

Tip: Choose the correct 12 g CO2 cartridge for your pistol and keep spare cartridges on hand to avoid interruptions during matches or training. Browse compatible magazines and replacement cartridges in the related gear section to build a ready, tactical setup.
