**Product features:**

## Product short description:

Pinecone-shaped golden brass knobs for traversina rails add a timeless touch to your home. Ideal for homeowners, renovators and furniture restorers looking for a classic detail that works with both traditional and modern interiors.

- **Material:** Solid brass construction with a gold finish for a refined look and reliable performance.
- **Design:** Pinecone-inspired shape blends classic ornamentation with understated elegance.
- **Use:** Suitable for doors, drawers, cabinets and rails; provides a comfortable, secure grip.
- **Installation:** Easy to install for replacements or upgrades; fits common mounting fittings.

## Product description:

## Product overview

These Pomoli in Ottone Dorato a Pigna for traversina are a pair of golden brass knobs designed for use on traversina rails and similar fittings; they suit buyers restoring equipment, furnishing tactical or duty gear stores, or upgrading domestic hardware. Definition: a traversina is a small

crossbar or rail used to mount knobs and fittings.

Made from cast golden brass with a decorative pine-cone (pigna) shape, the knobs combine an attractive look with practical grip and are suitable for military surplus, tactical, duty, and police retail contexts as well as home projects.

### Main features

Key specifications and benefits at a glance:

- **Material:** Cast golden brass for durability and long-term use.
- **Diameter:** 4.5 cm (measurement excludes threading).
- **Includes hardware:** Supplied as a pair with threaded screws for easy installation.
- **Design:** Pine-cone (pigna) profile for secure grip and decorative appearance.
- **Compatibility:** Compatible with our traversina rails and similar fittings.
- **Versatile use:** Suitable for domestic restoration and professional applications (tactical, duty, police, military surplus retail).

### How to use / When it's useful

Quick answer: these knobs replace or upgrade existing traversina-mounted pulls and are fitted using the supplied threaded screws. In most cases, installation requires only a screwdriver and matching hole in the traversina rail.

Use them to refresh worn knobs on equipment racks, display rails, cabinets or other traversina-style fittings where a robust, easy-to-grip brass knob is needed. They are practical for both retail outlets (military surplus, tactical, duty, police) and home restoration work.

### Care and notes

Basic care extends the finish and function of the brass knobs:

- Wipe with a soft cloth; use mild soapy water for cleaning and dry thoroughly.
- Avoid harsh chemicals or abrasive cleaners that can dull the finish.
- Check compatibility with your traversina before fitting; the diameter noted is without threading.
- Sold and priced per pair; installation screws are included.

### FAQ

**Q:** What are the exact dimensions of the knobs?

**A:** The knob diameter is 4.5 cm, measured without the threaded section. Verify the hole size on your traversina before ordering.

**Q:** Is the product sold as a single knob or a pair?

**A:** The listed price refers to a pair of knobs. Each pair includes the required threaded screws for installation.

**Q:** Are the mounting screws included?

**A:** Yes, each pair is supplied complete with threaded screws for straightforward mounting to compatible traversina rails.

**Q:** Are these knobs compatible with all traversina?

**A:** They are compatible with our traversina products. For other brands or custom rails, check the hole diameter and thread fit before purchase.

**Q:** Is the brass corrosion-resistant?

**A:** Golden brass offers good resistance to corrosion, but avoid prolonged exposure to harsh chemicals or salt environments to preserve the finish.

**Q:** Can these be used in tactical or military surplus applications?

**A:** Yes, their robust cast-brass construction and secure grip make them suitable for retail or restoration use in tactical, military surplus, duty, and police contexts—confirm size and mounting fit for specific equipment.

**Tip:** Choose the correct diameter and check thread fit before ordering; browse related knobs and traversina rails to match finishes and ensure a coordinated installation.
