Product short description:

The Casco SWAT US PASGT M88 ABS Softair is a PASGT-style helmet replica designed for airsoft players and tactical enthusiasts who want an authentic look and basic head protection during games and drills. Constructed from durable ABS, it pairs a military-inspired profile with lightweight comfort and an adjustable padded interior for a secure fit.

- **Material:** Durable ABS shell for realistic appearance and everyday use.
- **Design:** Authentic US PASGT M88-inspired profile with SWAT styling.
- **Fit:** Lightweight construction with adjustable internal padding for a secure, comfortable fit.
- **Use:** Ideal for airsoft, tactical simulations, training and reenactments to enhance realism.
- **Note:** Replica intended for recreational use; not certified as ballistic protection.

Product description:

Product overview

The SWAT US PASGT M88 ABS Softair Helmet is a replica PASGT-style helmet designed for airsoft players, trainers, and tactical hobbyists. It suits anyone looking for a realistic, lightweight

helmet for training, simulation, or display.

Definition: A PASGT-style tactical helmet replica made from high-strength ABS, intended for softair and training use. Limited stock is available due to high demand from the airsoft and training community.

Main features

Built for realism, comfort and basic impact protection during recreational and training activities.

- **High-strength ABS:** Shell made from durable ABS material for long-lasting use.
- **Impact resistance:** Constructed to withstand impacts up to 2 Joules.
- **Adjustable fit:** Internal straps and a chin strap provide a secure, customizable fit.
- **Lightweight:** Weighs approximately 580 grams for comfortable wear.
- **Professional look:** Black color with a PASGT M88 style suitable for tactical and military surplus collections.
- **Versatile use:** Ideal for softair, training drills, and simulation exercises.

How to use / When it’s useful

Use this helmet for airsoft games, training scenarios, or as part of a tactical display. It helps protect against low-energy impacts and improves realism in simulations.

Quick answer: It is best used for softair and training, not as certified ballistic protection.
In most cases, adjust the internal straps for a snug fit and wear the chin strap to keep the helmet secure during movement.

Care and notes

Simple care keeps the helmet functional and comfortable for longer.

- Not certified for ballistic or duty use; intended as a replica for softair and training.
- Clean with a damp cloth; avoid harsh solvents or abrasive cleaners.
- Keep away from high heat or direct sunlight to prevent warping of the ABS shell.
- Regularly inspect the chin strap and internal adjustment straps before each use.

FAQ

Q: Is the helmet adjustable?

A: Yes. The helmet includes internal adjustment straps and a chin strap to help achieve a secure, comfortable fit.

Q: How much does the helmet weigh?

A: The helmet weighs approximately 580 grams, making it lightweight for extended wear during games or drills.

Q: Is this helmet suitable for softair?

A: Yes. It is designed specifically for airsoft (softair) and training, offering a realistic appearance and basic impact protection.

Q: What material is the helmet made from?

A: The shell is made from high-strength ABS, chosen for durability and resistance to minor impacts.

Q: What level of protection does it offer?

A: The helmet can resist impacts up to 2 Joules. It is not a certified ballistic helmet and should not be used as official protective equipment.

Q: Can this helmet be used for police or duty work?

A: No. While the design resembles duty helmets, this product is a replica intended for training, airsoft and display—not for operational police or military protection.

Tip: Choose the correct variant or size for the best fit, and consider browsing related tactical helmets and accessories in our military surplus and police gear sections to complete your kit.
