Product short description:

Velcro Military Green 10 cm wide is a sturdy hook-and-loop tape designed for tactical gear, outdoor clothing and DIY projects. Ideal for professionals and outdoor enthusiasts who need reliable, low-profile fastening.

- **Material:** Hook-and-loop tape with robust construction for repeated use.
- **Width:** 10 cm wide for broad, secure attachment.
- **Color:** Military green that integrates with camouflage, tactical and outdoor gear.
- **Use:** Easy to apply and adjust; provides a secure hold for both professional and personal projects.

Product description:

Product overview

The Velcro Verde Militare 10 cm is a 10 cm-wide military green hook-and-loop tape designed for attaching name tapes, embroidered patches and other removable identifiers on uniforms and tactical gear. It is aimed at military, police, tactical and work uniform users who need a reliable, low-profile solution.

Definition: A 10 cm-wide military green hook-and-loop tape sold by the meter for patch and name-

tape attachment.

Main features

Compact list of the product’s main points for quick comparison.

- **Width:** 10 cm (wide surface for secure attachment).
- **Two variants:** hook side (rough) and loop side (soft, sew-on).
- **Colour:** military green, matches tactical and uniform fabrics.
- **Sold by the meter:** buy the exact length you need.
- **Durable materials:** built for repeated use and patch changes.

How to use / When it’s useful

Use this hook-and-loop tape to mount embroidered patches, name tapes or other ID panels where a removable solution is needed. The hook side normally attaches to the back of patches while the loop side is sewn to the garment or gear.

Quick answer: fit the hook side to the patch back and sew or secure the loop side to the uniform or carrier. In most cases, cut the tape to length, align the two sides, and test fit before final stitching.

Care and notes

Basic handling tips and practical notes to get the best life and fit from the tape.

- Sew the loop (soft) side to fabric for secure, long-term use; the hook (rough) side typically backs patches.
- Trim cleanly and test placement before permanent sewing.
- Store flat and dry to avoid deformation; avoid prolonged exposure to high heat.
- Availability can be limited—check stock before planning large orders.

FAQ

Q: What is the width of this Velcro?

A: The tape is 10 cm wide, providing a broad surface for patches and name tapes.

Q: Which variants are available?

A: There are two options: the hook (rough) side and the loop (soft) side. Choose the hook for patch backs and the loop for sewing onto garments.

Q: Can I buy it by the meter?

A: Yes. The product is sold by the meter so you can order the exact length needed for your project.

Q: What are the main uses?

A: Ideal for attaching name tapes, embroidered patches, removable ID panels and similar accessories on tactical, military or work uniforms.

Q: Is the military green colour suitable for uniforms and tactical gear?

A: Yes. The military green shade is intended to blend with common tactical and uniform fabrics used in military, police and duty gear.

Q: Which side should be sewn to the garment?

A: Sew the loop (soft) side to the garment; the hook (rough) side is normally attached to the rear of the patch for a secure removable fit.

Tip: Choose the correct variant (hook or loop) and the right meter length for your project—check stock levels and consider browsing related tactical and military surplus items to complete your setup.
