Product short description:

A metal extendable tonfa baton with a side-handle design, intended for security personnel and personal defense. It provides control and leverage in close-quarters situations while remaining compact when retracted.

- **Material:** Metal construction for strength and durability.
- **Design:** Traditional tonfa side-handle with extendable (telescopic) shaft for controlled handling.
- **Use:** Suitable for security work, patrol tasks, and personal defense training.
- **Operation:** Telescopic mechanism enables compact carry and rapid deployment.
- **Care:** Easy to maintain; wipe clean and inspect moving parts regularly.

Product description:

Product overview

The **Extendable Metal Tonfa** is a compact, telescoping defensive baton designed for security professionals, martial arts practitioners, and anyone seeking a reliable self-defense tool. It

combines a solid metal construction with a quick-deploy design for practical personal protection and training use.

Definition: this is a metal, extendable tonfa that locks at full length for defensive use and collapses for discreet transport. Suitable for tactical, military surplus, police duty, and martial arts applications where a sturdy, portable baton is needed.

Main features

Built for durability and control, the tonfa balances strength, weight and handling for everyday carry or training sessions.

- **Length:** 59 cm extended, 35 cm closed for easy transport.
- **Material:** 6061 duralumin for good strength-to-weight ratio and corrosion resistance.
- **Weight:** 750 grams for balanced maneuverability and impact control.
- **Heart-shaped guard:** hand protection at the intersection of the grip and shaft.
- **Shaped grooves:** ergonomic, non-slip grips on the main and side handles for secure handling.
- **Anti-slip end cap:** small head at the tip to prevent slipping during use.

How to use / When it’s useful

Quick answer: use the tonfa extended for reach and impact, and collapsed for transport or storage. It deploys quickly and locks in place for immediate use in defensive situations.

In most cases, this tonfa is useful for security personnel on duty, martial artists practicing tonfa techniques, and anyone who needs a compact defensive tool. Train with an instructor to learn safe handling, strikes, blocks, and retention techniques before operational use.

Care and notes

Simple care extends the life of the aluminum tonfa and keeps its mechanism reliable. Store dry, clean after use, and check the locking mechanism regularly.

- Wipe down with a dry or slightly damp cloth; dry thoroughly to prevent corrosion in joints.
- Inspect the telescoping lock and grips before each use to ensure secure deployment.
- Store collapsed in a bag or pack to protect the finish and mechanism.
- Use and train responsibly; avoid reckless or unauthorized use and follow any applicable local rules.

FAQ

Q: What are the dimensions when open and closed?

A: The tonfa is 59 cm when fully extended and 35 cm when collapsed for transport.

Q: What material is the tonfa made of?

A: It is made from 6061 duralumin, chosen for its strength, light weight, and resistance to corrosion.

Q: How much does the extendable tonfa weigh?

A: The baton weighs 750 grams, offering a balance between maneuverability and impact stability.

Q: Can I use this tonfa for martial arts training?

A: Yes. It is suitable for martial arts like jujitsu and karate where tonfa techniques are practiced, but training with a qualified instructor is recommended.

Q: How fast is shipping and is tracking available?

A: Orders are shipped within 24 hours of payment and include shipment tracking so you can monitor delivery status.

Q: Can I pay with PayPal?

A: PayPal is currently not available for this item; other secure payment methods are accepted at checkout.

Tip: Choose the right length and handling style for your intended use—consider whether you need a more compact carry option or full reach for duty use—and browse related tactical and military surplus items to complete your kit.
