Product short description:

The **Cintura Blu 118 Soccorso Sanitario** is a professional emergency belt designed for EMS crews and support staff. It delivers reliable visibility, comfort and a stable, functional fit for routine and demanding shifts.

- **Material:** High?strength polypropylene fiber providing robustness, comfort and long service life.
- **Visibility:** Retroreflective buckle for improved recognition in daylight and low light conditions.
- **Fit:** Adjustable, stable and functional — Length 120 cm, Height 4 cm.
- **Choice:** A dependable option for users who require quality, recognizability and professional performance.

Product description:

Product overview

The **Cintura Blu 118 Soccorso Sanitario** is a professional blue duty belt designed for

emergency medical teams, 118 crews, rescue volunteers and civil protection staff who need reliable visibility and quick adjustment in high-intensity environments. It is a simple, durable belt intended for use with operational uniforms and ambulance crews.

Definition: a polypropylene-fiber emergency belt with a reflective buckle, 120 cm long and 4 cm high, built for everyday professional use. Ideal for tactical, medical rescue and duty use in both urban and roadside emergencies.

Main features

Built for professional use with clear focus on visibility, durability and comfort.

- **Material:** polypropylene fiber for light weight and strong tensile resistance
- **Reflective buckle:** improves operator visibility in low light
- **Dimensions:** 120 cm length and 4 cm height for stable fit
- **Weather resistance:** designed to resist moisture, wear and common contaminants
- **Ease of use:** rapid donning and simple adjustment, compatible with gloves

How to use / When it’s useful

Quick answer: use the belt as a visible, everyday duty belt for emergency medical personnel, ambulance crews and volunteers during active service and public events. It fits over standard duty trousers and most operational uniforms.

In most cases, the belt is used during ambulance transport, triage, on-scene rescue and public safety operations where visibility and a reliable, adjustable belt are required. It is also suitable for training, volunteer teams and civil protection tasks.

Care and notes

Simple care keeps the belt effective and extends service life. Inspect before each shift and clean as needed.

- Wipe clean with mild soap and water; avoid prolonged chemical exposure
- Inspect buckle and webbing for wear or damage before use
- Store dry, away from direct heat and sharp objects
- Designed as an operational belt—not a load-bearing or fall-protection device

FAQ

Q: Is the belt adjustable?

A: Yes. The 120 cm length allows straightforward adjustment and a secure fit for a range of body sizes.

Q: Is this belt suitable for daily professional use?

A: Yes. It is designed for intensive use by medical and rescue personnel and for repeated wear in demanding conditions.

Q: Is the buckle really reflective?

A: The buckle includes reflective material to increase visibility in low-light and roadside conditions, improving passive safety for the operator.

Q: Is the belt resistant to moisture and external agents?

A: The polypropylene fiber offers good resistance to moisture, wear and common contaminants, supporting durability in field use.

Q: Will it fit standard medical uniforms?

A: Yes. The 4 cm height and adjustable length are designed to be compatible with standard duty trousers and operational uniforms.

Q: Can volunteers and civil protection teams use this belt?

A: Yes. The design suits emergency services, volunteers and civil protection staff who need a visible, reliable duty belt.

Tip: Choose the right belt fit for comfort during long shifts and check related items such as technical gloves, high-visibility vests and ambulance accessory pouches to complete your operational kit.
