Product features:

Product short description:

Compact roll-up magazine utility pouch in Vegetata camouflage, designed for outdoor enthusiasts and tactical users who need reliable, space-saving magazine storage.

- **Material:** Durable, wear-resistant construction built for repeated field use.
- **Design:** Roll-up, compact layout optimizes space and secures magazines during movement.
- **Compatibility:** MOLLE system for easy attachment to backpacks and tactical vests.
- **Camouflage:** Vegetata pattern blends with natural environments for improved concealment.

Product description:

Product overview

The Tasca Utility Portacaricatori Avvolgibile Vegetata Molle is a foldable utility and magazine

pouch designed for tactical, military surplus, duty and police use. It suits users who need a durable modular pouch that attaches to belts and MOLLE systems for field work or outdoor activities.

Definition: a compact, roll-up utility/magazine pouch made from 1000 Denier fabric with adjustable attachment straps and drainage holes. It is a practical addition to tactical setups, duty rigs and everyday carry kits.

Main features

Built to be durable and versatile, this pouch combines a rugged fabric with modular attachment options for flexible use.

- **1000 Denier fabric** for strength and long-lasting use.
- **Modular MOLLE design** with adjustable passants for belt or gear attachment.
- **Foldable profile** — compact when closed for easy transport.
- **Velcro loops** for secure belt attachment.
- **Drainage holes** to prevent water buildup inside the pouch.
- **Size**: closed 7 x 25 cm; open 30 H x 25 cm L.

How to use / When it’s useful

Use it attached to a duty belt, MOLLE panel, or other compatible carrying systems to hold magazines or small tools and accessories. Roll or fold the pouch when empty to save space in your kit bag.

Quick answer: attach via the adjustable passants or velcro loops to any compatible belt or MOLLE webbing. In most cases, the drainage holes and heavy-duty fabric help keep contents protected during outdoor use.

Care and notes

Simple care keeps the pouch performing well; treat it like other tactical fabric gear.

- Brush off dirt and rinse with fresh water if exposed to salt or mud.
- Air dry completely before storage to avoid mold or odors.
- Check velcro and straps regularly for wear and secure attachment.
- Note: drainage holes allow water to escape but do not make the pouch fully waterproof.

FAQ

Q: What are the pouch dimensions when closed?

A: Closed dimensions are 7 x 25 cm.

Q: What are the dimensions when opened?

A: Open size is 30 cm height x 25 cm length.

Q: Is the 1000 Denier material waterproof?

A: The 1000 Denier fabric is very durable and water-resistant, but the pouch is not fully waterproof; drainage holes are included to let water escape.

Q: Can I attach it to any belt or gear?

A: Yes. Adjustable passants and velcro loops allow attachment to most belts and MOLLE-compatible systems.

Q: Is this pouch suitable for professional use?

A: Yes. Its rugged construction and modular design make it suitable for duty, police, and tactical applications.

Q: How should I clean and maintain the pouch?

A: Remove loose dirt, rinse with fresh water if needed, let it air dry, and inspect attachments for wear before use.

Tip: Choose the correct variant or size for your belt and gear setup, and check related tactical and military surplus pouches to build a complete kit.
