Product short description:

The Coyote 30L Tactical Military Backpack is a durable pack designed for hikers, campers and everyday carry. Made from tough, high-quality materials, it delivers reliable performance and comfort for outdoor activities and daily use.

- **Material:** Durable, high-quality construction for long-lasting use.
- **Capacity:** 30 liters — compact yet roomy for day hikes and daily carry.
- **Organization:** Multiple compartments and pockets to keep gear organized.
- **Fit:** Ergonomic design with adjustable shoulder straps for a comfortable carry.
- **Modularity:** MOLLE webbing lets you attach pouches and accessories.

Product description:

Product overview

The Zaino Militare Tattico Coyote 30 Litri is a 30?liter tactical military backpack designed for day trips, airsoft (softair), camping, trekking and field or duty use by military, police or outdoor enthusiasts. It balances durable materials and an organized layout with ergonomic carrying

features.

Definition: a 30?litre Cordura tactical pack with multiple compartments, MOLLE-style front straps and hydration routing for practical, everyday outdoor and tactical use.

Main features

Built for durability and organized carrying, this pack combines a compact profile with features for load control and easy access.

- **30?liter capacity:** roomy enough for day gear while remaining compact and manageable.
- **Cordura 1000 Denier fabric:** abrasion-resistant material for long service life.
- **Ergonomic carrying system:** padded, adjustable shoulder straps (~6 cm wide) with sternum strap and quick?release waist belt for better weight distribution.
- **Multiple compartments:** two main zippered compartments, internal mesh pockets, two front pockets and a rear pocket — all with two-way zippers for organized storage.
- **MOLLE-style front straps:** front pass-throughs allow attachment of pouches or extra gear.
- **Hydration-ready:** D?rings for routing a hydration tube and a sealed nylon patch port for antenna or earbud routing to the main compartment.
- **Compression and carry features:** adjustable side compression straps and a top carry handle for quick handling.

How to use / When it’s useful

Quick answer: use this pack for day hikes, airsoft sessions, short camping trips or as a duty bag for police and military tasks where a compact, organized load is needed. The layout keeps essentials accessible and supports a hydration tube.

In most cases, pack heavier items close to the back and use the compression straps to reduce bulk. The sternum strap and waist belt improve comfort on longer walks and help stabilize the load during active use.

Care and notes

Basic care will keep the backpack functional and extend its life; inspect seams and hardware before heavy use.

- Clean with a damp cloth and mild soap; avoid machine washing or dry cleaning.
- Rinse and fully dry after exposure to mud or salt water to prevent fabric or hardware damage.
- Check zippers and strap buckles regularly; repair worn stitching promptly.
- Do not overload beyond the intended capacity to avoid stress on seams and straps.

FAQ

Q: What is the backpack capacity?

A: The pack has a capacity of 30 litres, suitable for day trips, airsoft, short camping excursions and duty use without being bulky.

Q: What material is the backpack made of?

A: The backpack is made from Cordura 1000 Denier, a heavy-duty fabric known for abrasion resistance and durability in outdoor and tactical environments.

Q: Is this backpack suitable for trekking?

A: Yes. Its ergonomic straps, sternum strap and waist belt make it suitable for trekking and long walks when loaded appropriately for a day or short trip.

Q: Does the pack include a hydration bladder (hydrobag)?

A: The pack is hydration-ready: it provides D?rings for routing a hydration tube and a sealed nylon port for tube routing, but a separate bladder is not specified with the product.

Q: What are the backpack dimensions?

A: Dimensions are 28 cm depth x 42 cm height x 23 cm width, providing a compact profile while holding up to 30 litres of gear.

Q: How much does the backpack weigh?

A: The pack weighs approximately 1.2 kg, making it lightweight yet sturdy for tactical, duty or outdoor use.

Tip: Choose the right variant or size for your intended use and check related tactical and military surplus items like pouches, hydration bladders and compression straps to assemble a complete loadout for duty, police or outdoor activities.
