Product short description:

The NERG ICE Rock Plus Anatomic 45 Litri backpack is a 45-liter outdoor pack designed for hikers and explorers who need comfort, support and practical organization.

- **Material:** Durable, lightweight materials provide strength without extra weight.
- **Capacity:** 45 liters of storage to carry essential gear for day hikes or longer outings.
- **Fit:** Ergonomic anatomic design with adjustable straps and lumbar support to reduce fatigue on long walks.
- **Organization:** Multiple compartments and pockets keep equipment neatly arranged and accessible.

Product description:

Product overview

The NERG ICE Rock Plus Anatomic 45 Litri is a 45?liter, anatomically designed heavy?load backpack built for military professionals, tactical units, rescue teams, alpine guides and anyone who must carry large or hazardous loads in tough conditions. It combines ergonomic support with

load?management features for extended operations.

Definition: A 45?liter tactical/military duty backpack with an anatomic support system that reduces shoulder and back pressure while improving load stability.

Main features

Engineered for comfort, durability and secure gear attachment, the pack uses quality materials and branded hardware for reliable field performance.

- **Anatomic back system** with a central 6061?T6 aluminum support bar and crossed fiberglass rods for strong, comfortable load transfer.
- **Dual?density padding** using open?cell PU foam and closed?cell EVA foam for ergonomic cushioning and shock absorption.
- **Breathable AIR MESH lining** on contact areas to reduce sweat and improve ventilation during long marches.
- **Three main compartments** for organised storage: rear main compartment, middle quick?access, and front pocket for small kit.
- **External attachment systems** including 6 ski/tool plates with straps, 2+2 semi?rigid belt slots, 2 vertical 7?position webbing straps with quick?release hooks, 2 ice?axe loops and 4 triangular compression straps.
- **Durable 900 Denier Poly fabric** with NEXUS ITW and DURAFLEX NATIONAL MOLDING hardware for abrasion and weather resistance.

How to use / When it’s useful

Use the pack for extended patrols, mountain rescue, forestry work or any task requiring secure transport of heavy kit. Load heavy items close to the spine in the rear compartment, secure external tools to the dedicated plates and fine?tune the waist belt and shoulder straps for even weight distribution.

Quick answer: Adjust the waist belt first, then shoulder straps and sternum strap to stabilise the load. In most cases, positioning bulky items near the back and using the compression straps will reduce sway and fatigue.

Care and notes

Maintain the pack by keeping zippers and hardware clean and inspecting straps after heavy use. Designed for rugged conditions but follow these care points to extend life and performance.

- Spot clean with mild soap and water; air dry away from direct heat.
- Check and tighten buckles and webbing before each mission; replace damaged straps promptly.
- Water?resistant construction and compression straps help in bad weather, but the pack is

not guaranteed fully waterproof—use a rain cover for immersion or heavy rain.
- Available in limited runs: olive green, black and vegetato (camouflage); lead time typically 7–10 days due to limited stock.

FAQ

Q: What is the pack capacity?

A: The NERG ICE Rock Plus has a 45?liter capacity, suitable for carrying tool kits, rescue gear and additional equipment for multi?day operations.

Q: Is the backpack waterproof?

A: The fabric and compression straps offer good water resistance for adverse weather, but the pack is not fully waterproof. Use a rain cover for prolonged exposure or immersion.

Q: What materials are used in construction?

A: The pack body is 900 Denier Poly; internal support includes a 6061?T6 aluminum bar and fiberglass rods. Padding combines PU and EVA foams; hardware is from NEXUS ITW and DURAFLEX NATIONAL MOLDING.

Q: Is it comfortable for long marches?

A: Yes. The anatomic back, S?shaped padded shoulder straps and waist belt distribute weight to reduce pressure on shoulders and spine during prolonged use.

Q: What attachment options does it offer?

A: Multiple external options: 6 ski/tool plates with straps, semi?rigid belt slots, vertical 7?position straps with quick release, ice?axe loops and triangular compression straps for secure external carry.

Q: How long does delivery take?

A: Delivery is typically between 7 and 10 days due to limited production and high demand. Times may vary depending on stock and import processing.

Tip: Choose the color variant that matches your operational environment (olive green, black or vegetato) and ensure the waist belt fits your measurements before ordering; check related tactical packs and accessories to complete your loadout.
