Product short description:

The Olive Green Paracord Survival Bracelet (Braccialetto Paracord di Sopravvivenza Verde Oliva) is a compact, wearable emergency tool for outdoor enthusiasts, hikers and campers.

- **Material:** Durable paracord construction that can be unraveled for use in the field.
- **Use:** Provides a length of strong cord for building shelters, repairing gear or other emergency tasks.
- **Design:** Compact, low-profile olive green style that blends with outdoor clothing and equipment.
- **Fit:** Easy to put on and remove; practical for outdoor use without bulk.

Product description:

Product overview

The Olive Drab Paracord Survival Bracelet is a wearable outdoor tool for campers, hikers, hunters, sailors, and anyone who needs compact emergency gear. It combines braided parachute-grade nylon cord with a survival buckle that includes a compass, a fire starter and a

whistle.

Definition: A paracord survival bracelet is a braided nylon cord bracelet that stores usable cord and small survival tools for emergency and outdoor use. Suitable for tactical, military surplus, and duty-style applications where compact readiness matters.

Main features

Built from parachute-grade paracord and designed for everyday wear, this bracelet offers practical survival functions in a compact form.

- **Parachute-grade paracord:** Nylon cord with 7 inner strands for strong, reliable cordage.
- **Survival buckle:** Integrated compass, fire starter (ferro rod style) and whistle for basic emergency use.
- **Model and size:** Cobra weave; width 2 cm, thickness 5 mm for a comfortable fit.
- **Emergency cord:** Bracelet can be unraveled to provide metres of usable cord for shelter, repairs or gear lashings.
- **Water-resistant:** Nylon paracord resists water, suitable for nautical and outdoor activities.
- **Custom sizing:** We personalize the length based on your wrist measurement in cm.

How to use / When it’s useful

Wear the bracelet daily as a lightweight piece of survival gear; carry it on trips, hikes, or patrols. If needed, open the buckle to use the compass for rough navigation, blow the whistle to signal, or strike the fire starter to create sparks for tinder.

Quick answer: Wear it for readiness; unwrap it to access cord and tools in an emergency.
In most cases, the compass gives general orientation, the whistle attracts attention, and the fire starter aids in ignition when used with proper tinder.

Care and notes

Simple care keeps the bracelet functional and comfortable. Follow these practical notes and safety reminders.

- Measure your wrist in cm with a soft tape to order the correct, custom length.
- Rinse with fresh water and air-dry if exposed to saltwater; nylon is water-resistant but not maintenance-free.
- Use the fire starter responsibly and only where open flames are permitted; follow local fire safety rules.
- Do not rely solely on this bracelet for critical survival situations—carry additional tools and navigation aids as needed.

FAQ

Q: Is the bracelet adjustable?

A: No. The bracelet is made to order to the wrist measurement you provide in cm, so it fits without on-the-spot adjustment.

Q: How strong is the paracord?

A: The bracelet uses parachute-style paracord with 7 inner strands of high-strength nylon. It is suitable for general cordage tasks; do not substitute for specialized load-bearing rope.

Q: Is the compass accurate?

A: The integrated compass is intended for basic directional guidance and orienting yourself outdoors. For precise navigation, use a dedicated compass or GPS device.

Q: Is the bracelet waterproof?

A: The nylon paracord is water-resistant and tolerates wet conditions, making it suitable for boating and outdoor use. Dry thoroughly after extended exposure to water.

Q: Can I use the fire starter to light a fire?

A: Yes. The included fire starter is designed to produce sparks to ignite tinder in emergency situations. Practice safe fire-making and follow local regulations.

Q: How do I provide my wrist size?

A: Measure your wrist circumference in centimeters using a soft tape measure and enter the value at checkout or in the notes field; we will customize the bracelet length accordingly.

Tip: Measure your wrist carefully and choose the correct size variant to ensure a comfortable fit. Browse related tactical and outdoor accessories to build a compact survival kit that matches your needs.
