Product short description:

The SU2 Thermoformed Cordura Holster is a practical, secure holster designed for everyday carry and outdoor use. It is aimed at users who want reliable retention and comfortable, low-profile carry while keeping the firearm protected.

- **Material:** Durable Cordura construction provides abrasion resistance and long-lasting use.
- **Design:** Thermoformed shape contours to the firearm for a stable, consistent fit.
- **Retention:** Secure hold keeps the weapon in place while allowing a controlled draw.
- **Use:** Lightweight and discreet, suitable for daily carry and outdoor activities.

Product description:

Product overview

The SU2 thermoformed Cordura holster is a belt-mounted holster designed for professionals and civilian users who need a reliable duty or tactical carry solution. It is a molded Cordura holster with an active retention device, suitable for police, security, range use and everyday duty. Simple definition: a thermoformed Cordura belt holster with adjustable paddle supports and an insertion-

lock safety.

This holster locks the pistol on insertion, offers a second level of retention, and includes adjustable paddle supports to change cant and ride height. It is available in model-specific variants for many Beretta, Glock, H&K, Sig Sauer, Taurus, Walther and Springfield pistols; select the correct model and handedness from the product options. Limited stock is often available.

Main features

Durable, adjustable and secure — the SU2 holster balances everyday comfort and duty-ready retention for tactical and police carry needs.

- **Thermoformed Cordura construction:** rugged, wear-resistant material for regular use.
- **Vega Pull Side retention:** locks the pistol as it is seated in the holster for immediate retention.
- **Secondary trigger-bridge safety:** optional second level of retention by positioning the block on the weapon’s trigger bridge.
- **Adjustable paddle supports:** change cant, weapon height relative to the belt, and belt-block height for a custom fit.
- **Model-specific variants:** compatible with many Beretta, Glock, Heckler & Koch, Sig Sauer, Taurus, Walther P99 and Springfield XD models — choose the correct variant in the dropdown.
- **Left-hand option:** available by selecting the left-handed version in the menu.

How to use / When it’s useful

Quick answer: fit the holster to your belt or select the paddle position you prefer, then insert the pistol until the Vega Pull Side locks engage. In most cases, set the paddle cant and ride height so the weapon draws cleanly for your dominant hand and body position.

Use this holster for duty, training, tactical tasks or civilian open carry where allowed by law. The adjustable paddle and dual-retention options make it useful for shooters who need a secure, repeatable draw and a durable tactical gear solution.

Care and notes

Basic care keeps the holster functioning reliably. Check fit and operation regularly and choose the correct model variant before purchase.

- Clean with a damp cloth; avoid soaking or harsh chemicals.
- Verify compatibility with your pistol model before ordering.
- Select left- or right-hand configuration in the product options if needed.
- Do not modify retention devices; alterations can affect safety and function.

FAQ

Q: Which pistol models are compatible with the SU2 Cordura holster?

A: The SU2 is produced in model-specific variants for many firearms. Compatible makes include Beretta (92, 92 Compact, 96, 98, Brigadier, PX4), Glock (17, 19, 22, 23, 25, 26, 27, 28, 31, 32, 33, 37, 38), Heckler & Koch (P2000, USP, USP Compact), Sig Sauer (2009, P228, P229, PRO 2022, PRO 2340), Taurus (100, 101, 24/7, 92, 99), Walther P99 and Springfield XD. Choose the correct variant in the dropdown.

Q: Is there a left-handed version of the holster?

A: Yes. A left-hand variant is available — select the left-handed option from the product menu before adding to cart.

Q: How does the Vega Pull Side retention work?

A: The Vega Pull Side device secures the pistol as it is seated into the holster, providing immediate retention. The mechanism releases when the correct draw motion is used, supporting controlled access to the firearm.

Q: Can I adjust the holster angle and height on my belt?

A: Yes. The holster includes paddle supports and VH-Holes passants that allow you to change cant, weapon height relative to the belt, and belt-block height for personal comfort and ergonomic draw.

Q: What material is the holster made from and is it durable?

A: The SU2 is made from thermoformed Cordura, a robust textile known for abrasion resistance and daily-use durability. Regular inspection and basic care will prolong its service life.

Q: Is this holster suitable for duty or tactical use?

A: Yes. The holster’s retention features and adjustable paddle make it suitable for duty, tactical work and training. Always follow your organization’s equipment rules and local laws when choosing carry gear.

Tip: Before purchasing, select the correct variant for your pistol model and handedness from the dropdown. Consider pairing this holster with complementary tactical or duty gear in our catalog to complete your setup.
