- **Closure:** Three-tooth clasp provides a secure, comfortable fit.
- **Design:** Braided pattern with careful detailing for a rugged, refined look.
- **Wear:** Suitable for hiking, camping or daily wear to express an adventurous style.

Product description:

Product overview

The Braccialetto Paracord Tredenti is a wearable paracord bracelet for outdoor enthusiasts, tactical users, and anyone who values practical everyday carry. It combines a fashion-forward look with usable nylon cord that can be deployed in emergencies.

Definition: a paracord bracelet made from three parachute-grade nylon cords (black, white, red) with five high-strength inner strands for emergency cordage. Keywords: tactical paracord bracelet, military surplus-style accessory, outdoor survival gear.

Main features

Built from durable parachute nylon, this bracelet offers simple, reliable cordage in a compact accessory. Key features include:

- **Parachute-grade materials:** three nylon cords (black, white, red) forming the outer braid.
- **Inner strands:** five white high-strength nylon filaments inside the sheath for emergency use.
- **Water-resistant:** nylon construction suitable for wet weather and outdoor use.
- **Custom fit:** set your wrist measurement in cm for a tailored length.
- **Width:** 2 cm for a balance of comfort and visibility.
- **Versatile look:** modern colorway that works for casual, tactical, or youth fashion.

How to use / When it’s useful

Quick answer: untie or unweave the bracelet to access several metres of cordage for temporary repairs, shelter, or emergency uses. It is a compact source of strong cord for outdoor, camping, or everyday situations.

In most cases, the bracelet serves as a convenient backup cord rather than a certified load-bearing rope; carry it as part of your EDC or outdoor kit for tasks like tying gear, making shelter, or minor repairs. Parachutists also recover cord from parachutes after landing, which is the origin of its materials.

Care and notes

Simple care keeps the bracelet functional and looking good. Follow these notes for safe use and longevity:

- Hand wash with mild soap, rinse, and air dry — avoid high heat.
- Inspect the inner strands after use; replace if damaged or frayed.
- Not intended as certified life-safety or climbing rope — do not use for load-bearing or rescue.
- Avoid prolonged direct flame or high temperatures that can melt nylon.

FAQ

Q: Is the bracelet water-resistant?

A: Yes. The bracelet is made from water-resistant nylon suitable for rain and general outdoor conditions. Dry it thoroughly after prolonged exposure to moisture.

Q: How do I request a custom size?

A: Provide your wrist measurement in centimetres using a measuring tape. We will cut and assemble the bracelet to that length for a comfortable fit.

Q: Can I use the cord in emergencies?

A: Yes. The bracelet can be unraveled to access metres of cord for temporary repairs, tying, or shelter. It is not a certified rescue rope.

Q: What colors are available?

A: The standard Braccialetto Paracord Tredenti uses black, white, and red nylon cords as described.

Q: Is this suitable for youth fashion?

A: Yes. The modern color combination and slim 2 cm width make it suitable as a casual or youth fashion accessory with a tactical look.

Q: What is the bracelet width?

A: The bracelet is 2 cm wide, offering a visible but comfortable profile on most wrists.

Tip: Choose the correct wrist measurement in centimetres when ordering and consider browsing related tactical and outdoor accessories to complete your everyday carry set.
