Product short description:

The Holster Extreme in White Polymer is a professional holster for law enforcement, security and tactical operators who need durable, comfortable carry with fast access. Built from quality polymer, it combines rugged performance with a clean, modern look suited to professional environments.

- **Material:** High-quality white polymer construction for durability and low maintenance.
- **Use:** Designed for professional daily use with reliable retention.
- **Design:** Ergonomic profile for all-day comfort and a contemporary white finish.
- **Access:** Allows quick, secure access to your work tool while keeping it stable.
- **Ideal:** For professionals who want functionality and style without compromise.

Product description:

Product overview

The **Fondina Extreme Polimero Bianco Uso Professionale** is a white Kydex duty holster designed for Police forces, security operators and private guards who need a reliable, lockable carry solution. It is suited for tactical and duty use and for users seeking a holster with an automatic PUSH DOWN safety.

Definition: a Kydex (thermoformed polymer) duty holster with an automatic PUSH DOWN locking system, lined internally to protect the firearm.

Main features

Solid construction and practical features that balance weapon protection, retention and fast access.

- **PUSH DOWN safety system:** Automatically locks when the pistol is inserted and releases with a simple push of the unlock button.
- **Kydex construction:** Thermoformed polymer body for durable, lightweight duty use.
- **Internal lining:** Protects the firearm from scratches and surface wear.
- **Open-top design:** Faster, unobstructed draw — shaped for Beretta 92/98 models.
- **Adjustable retention:** Friction can be fine-tuned with the black retention screw using an Allen key.
- **Right- and left-hand versions:** Left-hand holsters available with an approximate 15-day lead time.

How to use / When it’s useful

Use the holster as a duty or tactical holster for on-duty carry, patrol work, or private security detail. Insert the pistol fully to engage the PUSH DOWN lock and press the release button for a controlled draw.

Quick answer: set the retention screw to adjust draw resistance, but be careful—small turns make noticeable changes.
In most cases, start with small adjustments and test with an unloaded firearm until you find the preferred balance between retention and speed.

Care and notes

Basic care keeps the holster functioning reliably and protects your firearm.

- Wipe clean with a damp cloth; avoid strong solvents that may damage the lining or finish.
- Do not over-tighten the retention screw — it is sensitive and can affect the lower safety mechanism; return it to the original position if problems occur.
- Check retention and the PUSH DOWN release regularly during routine inspections.
- Left-handed models require a 15-day manufacturing or fulfillment period; order accordingly.

FAQ

Q: Which pistol models fit this holster?

A: The holster is shaped for Beretta 92/98 models. Verify fit with your specific pistol variant before use.

Q: Can I adjust the friction/retention?

A: Yes. Use the black retention screw and an Allen key to increase or decrease friction. Make small adjustments and test the draw each time.

Q: Is there a left-handed version?

A: Yes. Left-hand versions are available but have an estimated 15-day wait from the time of purchase.

Q: How easy is the safety system to operate?

A: The PUSH DOWN system locks automatically on insertion and releases with a simple push of the unlock button for a quick, secure draw.

Q: Will the holster protect my firearm from scratches?

A: Yes. The interior is lined to reduce surface wear and protect the finish of your pistol during daily use.

Q: Is this holster suitable for tactical or duty use?

A: Yes. It is designed for duty and tactical applications, suitable for police, security personnel and other professional users seeking a secure carry solution.

Tip: Choose the correct hand orientation when ordering and consider testing retention with an unloaded firearm before regular use; browse related tactical and duty holsters or police gear to find matching accessories and mounts.
