Product short description:

The VH Shockwave Concealment holster is a molded polymer holster engineered for discreet, comfortable concealed carry. It suits users who want a practical, reliable option for daily concealed carry with a low-profile design.

- **Material:** High-quality molded polymer that resists wear while remaining lightweight.
- **Design:** Ergonomic, low-profile shape for a smooth, quick draw and secure carry.
- **Fit:** Contoured retention provides a secure, tailored fit for concealed carry.
- **Use:** Ideal for everyday concealed carry when discretion, comfort, and durability matter.

Product description:

Product overview

The VH Shockwave Concealment Injection-Molded Polymer Holster is a secure, everyday carry holster for law enforcement, duty use, and tactical or civilian concealed carry. It is designed for

users who need a reliable retention system and comfortable, repeatable draws.

Definition: a injection-molded polymer holster with an automatic safety on the trigger guard that locks the firearm when seated. Compatible with various service pistols and available in right- or left-hand versions.

Main features

Simple, durable construction with adjustable retention and multiple mounting options—built for duty, police, and tactical carry.

- **Automatic safety on the trigger guard:** engages when the firearm is inserted for immediate secure carry.
- **Middle-finger release lever:** press the lever located under the grip in a natural firing grip to draw.
- **Adjustable retention screw on the barrel area:** fine-tune how tightly the holster holds your weapon.
- **Double belt-loop kit included:** two mounting options in the package for different carry styles.
- **Right- and left-hand versions:** available to order for user preference.
- **Model compatibility:** Beretta 92/96/98 (in stock); Glock, H&K USP Standard, USP Compact and Sig Sauer 2022 (15-day arrival).

How to use / When it’s useful

Quick answer: insert the pistol and the trigger-guard safety engages automatically; to draw, press the release lever with your middle finger while maintaining a natural grip. This holster is useful for duty belts, concealed carry under a jacket, and for tactical training where secure retention is required.

In most cases, use the adjustable retention screw to set the draw resistance you prefer and fit the double kit pass-through to your belt. For models listed with lead time, order the correct hand orientation (right or left) when purchasing.

Care and notes

Maintain the holster for reliable operation and check fit before regular use. Follow these simple care points and safety reminders.

- Clean with mild soap and water; avoid harsh chemicals that can degrade polymer.
- Check and adjust the retention screw periodically to match your draw preference.
- Order the correct left- or right-hand version—handing is not interchangeable.
- For certain models (Glock, H&K USP, Sig Sauer 2022) expect a 15-day delivery from order confirmation.

- Do not modify the automatic safety mechanism; improper changes may affect safe operation.

FAQ

Q: Which pistol models fit this holster?

A: It fits Beretta 92/96/98, Glock, H&K USP Standard, USP Compact and Sig Sauer 2022 as listed. Verify model fit before mounting; Beretta models are normally stocked.

Q: Is the holster available for left-handed users?

A: Yes. Left-hand and right-hand versions are available on order—select the desired orientation when placing your order.

Q: How long does delivery take for Glock or H&K models?

A: For Glock, H&K USP Standard, USP Compact and Sig Sauer 2022 the expected arrival time is 15 days from order. Beretta 92/96/98 units are usually ready from stock.

Q: What is included in the package?

A: The package includes the injection-molded holster and a double belt-loop kit for different mounting options. No additional accessories are included unless specified at checkout.

Q: How does the automatic safety work?

A: When the firearm is seated in the holster the safety engages automatically on the trigger guard. To draw, press the release lever under the grip with your middle finger while assuming a natural hold.

Q: What material is the holster made from and is it durable?

A: The holster is made from injection-molded polymer designed for long service life and consistent performance. Regular inspection and basic care will maintain durability and function.

Tip: Choose the correct hand orientation and model fit before checkout, and consider browsing related duty and tactical holsters or mounting accessories to match your carry setup.
