Product short description:

The Assault Eagle Back Pack Vegetato 67 liters is a rugged outdoor backpack for hikers, hunters and tactical users who need high-capacity, organised carry. Built for demanding conditions, it combines roomy storage with practical features.

- **Capacity:** 67 liters with multiple compartments and pockets to organise gear.
- **Material:** Durable, high-quality construction designed for long service life.
- **Comfort:** Ergonomic design and adjustable shoulder straps for extended wear.
- **Camouflage:** Vegetato pattern to blend with natural environments.

Product description:

Product overview

The Assault Eagle Back Pack Vegetato is a large tactical backpack designed for military, police, and outdoor use, as well as for anyone needing a durable everyday carry option. It fits users who require organized storage, good load support, and weather-resistant materials.

Definition: a heavy-duty tactical pack with modular storage and hydration compatibility, built for long missions, hikes, and duty use. The pack holds approximately 65–67 liters of gear depending on how volume is measured.

Main features

Core features focused on capacity, comfort, and durability for tactical, military surplus, and duty applications:

- **Large main compartment** with secure straps and two mesh pockets; main internal size approx. 55 cm (H) x 33 cm (W) x 20 cm (D).
- **Multiple pockets**: two side pockets (23 x 13 x 6 cm each) and a lower compartment (32 x 15 x 7 cm) with three elastic mesh pockets and a zip pocket.
- **Hydration-ready** pocket compatible with a hydration bladder up to 3 liters.
- **Padded adjustable shoulder straps** with D-rings for accessory attachment and improved weight distribution.
- **Zippered rear pocket** for inserting a ballistic plate if required; rear foam padding adds breathability and comfort.
- **Padded adjustable lumbar belt and removable waist strap** to stabilize heavy loads and transfer weight to the hips.
- **Durable construction** in 600D polyester with drain grommets in compartments; pack weight around 2 kg.

How to use / When it’s useful

The Assault Eagle performs well for tactical operations, long-distance hiking, and heavy daily use. Pack heavier items low and close to the back, use the lumbar belt for load transfer, and attach small tools to the D-rings for quick access.

Quick answer: ideal for tactical teams, police, military surplus users, and outdoor enthusiasts who need a roomy, durable pack. In most cases, the hydration pocket and modular pockets make this pack a good choice for multi-day trips, patrols, or work shifts where organized storage and comfort are essential.

Care and notes

Basic care keeps the pack functional and extends its life; handle the pack like other heavy-duty polyester gear and avoid strong chemical cleaners.

- Wipe clean with a damp cloth and mild soap; air dry completely before storage.
- Do not assume ballistic protection: the pack has a pocket for a plate, but a protective plate is not included and must meet your operational standards.
- Avoid machine washing and high-heat drying to preserve seams and hardware.
- Check zippers, straps, and buckles regularly and replace or repair as needed for safe use.

FAQ

Q: What is the pack capacity?

A: The Assault Eagle Back Pack holds approximately 65–67 liters of total volume. Actual usable capacity depends on how gear is packed and external attachments.

Q: Can I insert a ballistic plate?

A: Yes, the rear compartment has a zippered pocket designed to accept a ballistic plate. The pack does not include a plate; any plate must meet your required protection and fit dimensions.

Q: Is the pack compatible with hydration systems?

A: Yes, there is a dedicated hydration pocket that fits a bladder up to 3 liters and routing for a drinking tube, keeping water accessible on long missions or hikes.

Q: Is it comfortable for long hikes?

A: The pack features padded, adjustable shoulder straps, a breathable foam back panel, and a padded lumbar belt to improve load distribution and comfort during extended use.

Q: What material is the backpack made from?

A: The Assault Eagle Back Pack is made from 600D polyester, chosen for abrasion resistance and general durability in outdoor and duty environments.

Q: How much does the pack weigh?

A: The backpack weighs about 2 kg unloaded, which is relatively light considering its large capacity and reinforced construction.

Tip: Choose the variant or size that fits your typical load and role—consider hydration, plate-carry needs, and attachment options. Also browse related tactical packs and accessories to match pouches, plates, or hydration systems for a complete setup.
