- **Note:** Subject to local legal restrictions. Check local laws and the product listing for included items and available accessories.

Product description:

Product overview

The JPX Jet Protector Standard is a non-lethal pepper spray pistol designed for personal defense by civilians, security personnel and duty officers who need a compact, stand-off option. It is

suitable for anyone seeking a tactical, non-lethal alternative to firearms for short-range protection.

Definition: the JPX Jet Protector Standard is a cartridge-fed, high-speed pepper spray pistol that delivers an irritant agent to temporarily incapacitate an attacker.

Main features

Built for quick response and safe stand-off use, the JPX combines a powerful irritant formula with a focused jet and rugged polymer construction.

- **Irritant formula:** Contains 10% oleoresin capsicum and 2.5% capsaicin (cayenne extract) to cause immediate eye, respiratory and skin irritation.
- **High jet speed:** 180 m/s for fast, accurate delivery.
- **Effective range:** 1.5 to 3 metres to keep the aggressor at a safe distance.
- **Cartridge capacity:** Two replaceable 10 ml cartridges per magazine.
- **Size & weight:** Length 19 cm, Height 9 cm, Width 3.7 cm; weight 250 g (unit), cartridge 135 g.
- **Construction & action:** High-impact orange polymer body; double-action with automatic cartridge change.

How to use / When it’s useful

Use the JPX Jet Protector Standard when you need a non-lethal option to stop or slow an attack from a short distance. Aim for the face and eyes from a safe stand-off distance and pull the trigger to release the irritant jet.

Quick answer: keep at least 1.5 metres distance and use original JPX cartridges. In most cases, the device temporarily incapacitates an attacker and allows time to leave the area or call for help.

Care and notes

Handle and store the JPX responsibly; regular checks and correct cartridges ensure reliable operation.

- **Distance warning:** Do not use at distances under 1.5 metres — close-range use may cause severe injury or permanent blindness.
- **Use only original cartridges:** Replace spent cartridges with JPX originals to guarantee performance and safety.
- **After accidental contact:** Rinse affected skin or eyes immediately with water and move to fresh air.
- **Maintenance:** Clean the unit after use and replace exhausted cartridges before storage.
- **Legal check:** Verify local laws and regulations before purchase and use.

FAQ

Q: How long does the irritant effect last?

A: Effects typically last 30–45 minutes depending on the person’s sensitivity. Residual irritation can vary with exposure and environment.

Q: Is the JPX Jet Protector Standard legal to own?

A: Laws vary by country and region. Check local regulations before buying or carrying this device.

Q: Can I reload the JPX?

A: Yes. The device uses replaceable cartridges and is designed to accept JPX replacement cartridges for quick reloading.

Q: Is it safe to use indoors?

A: It can be used indoors, but ensure good ventilation to reduce accidental inhalation of the irritant and protect bystanders.

Q: Are replacement cartridges available?

A: Replacement JPX cartridges are available from authorized sellers. Always use original cartridges for reliable performance.

Q: Can close-range use cause permanent harm?

A: Yes. Using the device at distances below 1.5 metres can cause serious injuries, including permanent eye damage. Follow distance and safety guidance.

Tip: Choose the correct variant and keep spare cartridges on hand; consider browsing related tactical and duty accessories in the same category to complete your personal defense kit.
