**Product price:**

**€5.50 tax included**

**Product codes:**

Reference: Art. 5016

EAN13: 0658606552227

UPC: 658606552227

**Product features:**

### Product short description:

Elastici Ragni con Ganci are bungee cords with integrated hooks designed to secure and organize items. Ideal for campers, DIYers and anyone who needs a practical, reliable fastening solution.

- **Material:** Durable elastic cord with integrated hooks for quick attachment and long-lasting use.
- **Use:** Suitable for camping, DIY, transport and garage organization.
- **Hold:** Provides a secure hold and consistent tension for everyday fastening tasks.
- **Versatility:** Multipurpose, easy to apply and remove, adaptable to many jobs.

### Product description:

### Product overview

**Elastici Ragni con Ganci** are elastic bungee cords with metal hook ends designed for users who need a reliable, versatile fastening solution—campers, transport handlers, tactical and police units, and general outdoor or storage use. These straps secure gear quickly and keep loads stable during transport or storage.

Definition: A flexible elastic cord with hooked metal ends for fastening and securing objects, 100

cm long and 8 mm thick, in olive green.

### Main features

Simple, durable construction makes these cords suitable for many uses where a secure hold is needed.

- **Durable materials:** Made from resilient elastic material for repeated use.
- **Metal hook ends:** Hook-shaped metal terminals provide a secure attachment point.
- **Size:** 100 cm length, 8 mm thickness — compact but versatile.
- **Color:** Olive green for low-visibility and tactical or outdoor use.
- **Versatile uses:** Good for camping, cargo transport, sports equipment, tactical or police kit, and general fastening tasks.

### How to use / When it's useful

Quick answer: Clip the metal hooks to anchor points and stretch the cord to hold items in place; release hooks to remove. These cords work well for tying down gear on backpacks, roof racks, trailers, or securing items in storage.

In most cases, use existing anchor points (loops, bars, rack rails) and avoid sharp edges that can cut the cord. For tactical, military surplus, or police use, employ them as temporary fasteners or for organizing equipment rather than for life-safety applications.

### Care and notes

Basic care extends service life and ensures safe use—inspect regularly and store dry when not in use.

- Inspect cords and hooks before each use for wear, cuts, or corrosion.
- Avoid overstretching beyond comfortable tension; do not use for lifting people or critical load-bearing tasks.
- Keep away from sharp edges and high heat to prevent damage.
- Store dry and out of direct sunlight to reduce material aging.

### FAQ

**Q:** What is the length of these cords?

**A:** Each cord is 100 cm long. This length suits many common fastening needs like luggage, camping gear, and small cargo.

**Q:** What material are the hooks made of?

**A:** The hooks are metal and shaped as hooks (uncino). They are intended to provide a secure terminal for attachment.

**Q:** What color are the Elastici Ragni con Ganci?

**A:** The cords are olive green, a discreet color that fits tactical, military surplus, outdoor, and police applications.

**Q:** How thick are the cords?

**A:** The cords have an 8 mm thickness, providing a balance between flexibility and holding strength for general fastening tasks.

**Q:** What are common uses for these elastic cords?

**A:** They are commonly used for camping, securing cargo during transport, fastening sports equipment, organizing tactical or police gear, and other general-purpose fastening needs.

**Q:** Are there any safety warnings?

**A:** Yes. Check cords and hooks before each use, avoid overstretching, and do not rely on them for load-bearing or life-safety purposes. Replace if damaged.

**Tip:** Choose the right length and thickness for your application and check related fastening and cargo straps to complete your kit. Browse similar tactical and military surplus items to find matching solutions.
