Product short description:

Embroidered DAE Tag is a durable identification accessory designed to increase visibility and recognition of your automatic external defibrillator (DAE). Ideal for first responders, workplaces and public spaces, it makes the device easy to locate when every second counts.

- **Material:** High-quality embroidered fabric, resistant and long-lasting for indoor and outdoor use.
- **Use:** Improves visibility and enables quick identification of the DAE in emergencies.
- **Compatibility:** Easy to attach and compatible with most DAE models.
- **Design:** Professional embroidered finish that highlights the device without covering controls.

Product description:

Product overview

The Targhetta Ricamata DAE is an embroidered identification patch for personnel authorized to use an automated external defibrillator (DAE). It is designed for medical, tactical, duty, and police

use to provide clear, immediate identification in emergency situations.

Definition: DAE stands for Defibrillatore Automatico Esterno (automated external defibrillator). This compact embroidered patch attaches to uniforms with a rear velcro backing for quick identification of certified responders.

Main features

Clear, durable identification that fits standard uniforms and tactical gear.

- **Embroidered design:** white thread heart with a central lightning bolt and adjacent white cross on a green thread background.
- **DAE marking:** the acronym DAE is visible at the bottom for immediate recognition.
- **Durable materials:** made to resist daily wear and washing while maintaining stitching quality.
- **Compact size:** dimensions 5 cm x 5 cm for low-profile placement on jackets, shirts, or tactical vests.
- **Easy attachment:** rear velcro allows fast removal or transfer between garments.

How to use / When it’s useful

Use the patch to mark trained defibrillator operators on duty, during events, in medical rooms, or on first responder and police uniforms. Attach it to a visible area of the uniform or tactical vest so others can quickly identify certified personnel.

Quick answer: Attach with the velcro backing to any compatible surface for instant identification. In most cases, it is used by trained staff, security, or law enforcement who may need to locate a certified DAE operator quickly.

Care and notes

Simple care keeps the embroidered patch legible and secure during regular duty use.

- Velcro attachment: check fastness before each shift to avoid loss during activity.
- Water-resistant materials: designed to withstand wet conditions, but avoid prolonged immersion when possible.
- Washing: the embroidery is made with durable thread; follow garment washing instructions to preserve appearance.

FAQ

Q: Is the patch waterproof?

A: The patch is made from water-resistant materials and is suitable for rainy or damp conditions.

Avoid prolonged immersion to preserve the backing and stitching.

Q: How do I attach the patch?

A: The patch has a velcro rear panel for quick attachment and removal. Press firmly onto a compatible velcro surface on uniforms or vests.

Q: What are the patch dimensions?

A: The patch measures 5 cm x 5 cm (width x height), making it compact and suitable for most uniform placements.

Q: Will the embroidery wear out with washing?

A: The embroidery uses high-quality thread designed to resist wear and regular washing. Follow garment care instructions for best results.

Q: Can the patch be customized?

A: This item is currently sold in the standard design with the heart, lightning bolt, cross, and DAE marking. Custom options are not available at this time.

Q: Is this suitable for tactical or police uniforms?

A: Yes. The compact design and velcro backing make it suitable for tactical, duty, and police uniforms where clear identification of DAE-trained personnel is needed.

Tip: Choose the best placement on your uniform or gear for visibility and check related identification patches or velcro panels to complete your duty or tactical setup without delay.
