Product features:

Product short description:

Silicone Lubricant W-70S is a versatile lubricant for reducing friction and protecting surfaces. Suitable for homeowners, mechanics and technicians who need reliable lubrication for household mechanisms and workshop tools.

- **Use:** Reduces friction on hinges, slides, locks and moving parts.
- **Performance:** Advanced formula provides long-lasting lubrication to help prevent wear and corrosion.
- **Application:** Easy to apply; penetrates quickly and spreads evenly.
- **Protection:** Leaves a thin protective film that resists water and dust.

Product description:

Product overview

Silicone Lubrificante W-70S is a silicone-based spray lubricant made for the gears of airsoft (softair) pistols and rifles and for similar mechanical parts. Definition: it provides a thin, durable silicone film that reduces friction and protects moving parts.

Designed for hobbyists, tactical gear users and maintenance of military surplus style equipment, it is also suitable for other mechanical devices that need a clean, long-lasting lubricant. Demand is high and stock can be limited.

Main features

Compact spray can with a precision straw for targeted application and reliable, long-lasting lubrication.

- **Effective lubrication:** Reduces friction and wear on gears and moving parts.
- **Precision application:** Supplied straw allows accurate delivery to hard-to-reach areas.
- **Protective film:** Helps limit dust, dirt build-up and corrosion on treated surfaces.
- **Versatile use:** Suitable for airsoft pistols and rifles and other mechanical devices.
- **Quality construction:** Formulated for consistent performance and reliability.

How to use / When it’s useful

Quick answer: shake the can well, fit the straw, and apply a small amount directly to the gears or moving parts needing lubrication. Allow a short settling time before reassembling and testing.

In most cases, use this lubricant during routine maintenance, after cleaning parts, or before storing equipment to protect against dust and moisture. It is useful for hobby use, tactical gear upkeep, and general mechanical maintenance.

Care and notes

Follow simple steps for best results and to preserve parts.

- **Shake before use:** Ensure even distribution of the silicone.
- **Use the supplied straw:** For precise application to gears and tight spots.
- **Apply sparingly:** A light coating is usually sufficient; avoid excess.
- **Check compatibility:** If unsure, test on a small area or check material compatibility with plastics or seals.

FAQ

Q: How do I use Silicone Lubrificante W-70S?

A: Shake the can well, attach the included straw, and spray a small amount onto the gears or moving parts. Wipe away any excess and let it settle before use.

Q: Is this lubricant only for airsoft guns?

A: No. It is designed for airsoft pistols and rifles but also works on other mechanical devices that

require silicone lubrication.

Q: How long does the lubricant last?

A: It provides a durable silicone film that reduces friction and wear for an extended period, depending on use and conditions.

Q: Does it protect against corrosion and dirt?

A: Yes. The lubricant leaves a protective barrier that helps limit corrosion and reduces dust and dirt accumulation on treated surfaces.

Q: Is it easy to apply in tight areas?

A: Yes. The can includes a precision straw for accurate application in hard-to-reach spots and small gear assemblies.

Q: The product is out of stock — what should I do?

A: Demand can be high. Check back soon or view similar lubricants and maintenance products in the store to find an alternative while stock is replenished.

Tip: Choose the can size or format that fits your maintenance routine and browse related tactical and maintenance items to complete your kit, such as cleaning tools, spare parts, and other lubricants for specific materials.
