Product short description:

Surfire EarPro earplugs offer comfortable, reliable hearing protection for people exposed to loud environments. Ideal for concerts, travel, commuting and daily work when you want to reduce background noise while maintaining clear listening.

- **Material:** Made from high-quality, skin-friendly materials that provide a soft feel and durable performance.
- **Use:** Designed for noisy settings—music events, transport, workplaces—helps reduce unwanted noise without overly muffling sound.
- **Fit:** Ergonomic shape adapts to the ear for a secure, comfortable fit suitable for extended wear.
- **Protection:** Provides effective acoustic isolation to limit distracting noise while preserving essential audio detail.

Product description:

Product overview

The Surfire EarPro Sound Protection Earplugs are reusable earplugs designed to reduce harmful noise for workers, musicians, and anyone exposed to loud environments. They suit construction crews, concert-goers, shift workers, and users looking for comfortable hearing protection for daily use.

Definition: Surfire EarPro are soft, ergonomic earplugs that provide measurable noise attenuation and long-wear comfort. They are suitable for tactical, duty, and general noise-reduction needs in military surplus and police-style gear collections.

Main features

These earplugs combine sound attenuation, comfort, and durability in a discreet ergonomic design.

- **Measured attenuation:** Reported noise reduction of about 26 dB at 85 dB and about 34 dB at 90 dB; higher reported attenuation values are given for very loud levels (performance depends on fit).
- **Soft, flexible material:** Conforms to the ear for immediate comfort during long shifts or events.
- **Easy to use:** Simple to insert and remove, no special preparation required.
- **Durable and reusable:** Built for repeated use when cleaned and cared for properly.
- **Low-profile design:** Ergonomic and discreet for public or professional settings.

How to use / When it’s useful

Quick answer: insert the earplug gently into the ear canal and adjust for a secure, comfortable seal. These earplugs are useful anytime you need to reduce noise exposure without blocking out all sound.

In most cases, they work well for construction sites, concerts, noisy workplaces, night shifts, and sleep in noisy environments. They are not designed for water use; do not use them for swimming or bathing.

Care and notes

Proper care extends life and maintains performance—clean after use and inspect for wear.

- Clean with a damp cloth and mild soap; dry completely before reuse.
- Store in a dry, cool place when not in use.
- Replace if material shows signs of wear, hardening, or loss of shape.
- Not suitable for use in water or as swim plugs.

FAQ

Q: How long do Surfire EarPro earplugs last?

A: Lifespan depends on frequency of use and care. With regular cleaning and proper storage they can last several months, but replace them if they show damage or lose shape.

Q: Can I sleep with these earplugs on?

A: Yes. They are designed for comfort and can be worn during sleep to reduce noise, provided they remain comfortable and maintain a proper seal.

Q: Are they waterproof?

A: No. These earplugs are not designed for use in water and should not be used for swimming or showering.

Q: How do I clean the earplugs?

A: Wipe them with a damp cloth and mild soap, then dry completely before using. Avoid harsh chemicals that could degrade the material.

Q: Do they protect against loud concerts?

A: Yes. They provide significant attenuation and are suitable for concerts, offering hearing protection while still allowing some sound clarity depending on fit.

Q: Are these earplugs suitable for professional duty or tactical use?

A: They are suitable for general duty and tactical environments where passive noise reduction and comfort are needed; choose products that meet your specific operational requirements.

Tip: Choose the variant or size that fits your ear for best protection and comfort, and consider browsing related tactical and duty hearing protection items to compare features before you buy.
