Product short description:

The Nicholson Multimax Pro XL Pinza Multiuso is a versatile multi-purpose pliers designed for DIY enthusiasts, tradespeople and technicians. It pairs durable construction with a balanced, compact layout for routine repairs, installations and on-the-go tasks.

- **Material:** Built from high-quality materials for durability and consistent performance.
- **Functions:** Several integrated tools provide cutting, clamping and general-purpose functions to cover a wide range of jobs.
- **Grip:** Ergonomic, secure handle for comfortable use and improved precision during detailed work.
- **Portability:** Compact, lightweight design that is easy to carry and ideal for quick fixes and field repairs.

Product description:

Product overview

The Nicholson Multimax Pro XL multi-tool pliers is a compact, stainless-steel tool for

tradespeople, outdoor users and duty professionals who need a versatile hand tool for work and leisure. Definition: the Multimax Pro XL is a 10 cm closed multi-tool pliers with 15 usable functions, built for durability and portability.

At 281 grams and made from stainless steel, it balances strength and carry convenience. It includes a durable nylon sheath that mounts horizontally or vertically on a belt, making it suitable for tactical, police, military surplus and everyday duty use.

Main features

Key features cover common workshop, camping and repair tasks while keeping the tool compact and easy to carry.

- **Needle-nose pliers** for precision work.
- **Universal pliers with crimper and cable cutter** for electrical and general repairs.
- **Screwdriver set** (three slotted blades plus a Phillips) for fastening jobs.
- **Blade and saw** for cutting wood and other materials.
- **File and awl** for finishing and punching.
- **Built-in ruler, can opener and bottle opener** for field or home convenience.
- **Compact size and sheath**: 10 cm closed, 281 g, stainless steel, with nylon belt sheath (horizontal or vertical).

How to use / When it’s useful

The Multimax Pro XL is intended for general repairs, camping and daily carry. Use the pliers and cutters for gripping and cutting, select the required screwdriver blade or blade/saw for cutting and trimming, and stow tools back in the closed position when not in use.

Quick answer: use it for small repairs, field tasks and maintenance where a compact multi-tool is needed. In most cases, the tool’s 15 functions cover common workshop, outdoor and household needs without carrying separate tools.

Care and notes

Basic maintenance keeps the tool reliable over time. Follow these simple care points:

- Wipe clean and dry after use to prevent corrosion.
- Apply a drop of light oil to the pivot occasionally for smooth action.
- Store folded in the nylon sheath when not in use.
- Handle blades and the saw carefully; keep out of reach of children.

FAQ

Q: What material is the Nicholson Multimax Pro XL made from?

A: The tool is made from stainless steel, which provides corrosion resistance and long-term durability for general use.

Q: How many functions does this multi-tool offer?

A: It offers 15 functions in total, and those functions are available while the tool is closed where applicable.

Q: What is the weight of the Multimax Pro XL?

A: The tool weighs 281 grams, making it sturdy yet still portable for belt carry or packing.

Q: Does the product include a sheath?

A: Yes. It includes a robust nylon sheath that can be mounted horizontally or vertically on a belt for quick access.

Q: What is the closed length of the tool?

A: The tool measures 10 cm when closed, which keeps it compact for pockets, packs or belt carry.

Q: Are the cutting and screwdriver tools safe to use while the tool is closed?

A: Most functions are designed to be used or accessed while the tool is closed, but always confirm the specific tool is locked and positioned correctly before use for safe operation.

Tip: Choose the Multimax Pro XL size and variant that fits your carry style and browse related multi-tools and tactical or duty accessories to build a complete kit without overloading your belt or pack.
