Product short description:

Three-slot magazine pouch for M-16 AR-70/90, designed for professionals and enthusiasts who need reliable, organized access to magazines in the field.

- **Material:** Constructed from durable materials to withstand regular field use.
- **Capacity:** Holds three M-16/AR-70/90 magazines for quick reloads.
- **Closure:** Reliable closures keep magazines secure while allowing fast retrieval.
- **Design:** Compact, lightweight profile ideal for field carry and easy storage.
- **Use:** Suitable for professional operators and hobbyists seeking improved efficiency and convenience.

Product description:

Product overview

The Three-Slot M-16 AR-70/90 Magazine Pouch is a compact carrier designed for users who need secure, quick access to M-16 or AR-70/90 magazines — ideal for tactical, military surplus, duty, and police use. Definition: a three-slot pouch made to hold up to three M-16 or AR-70/90

magazines securely.

It features a dual-use design that works as a modular attachment or as a standalone belt pouch in green camouflage-friendly color. The pouch is built for field use with a water-resistant material and a durable nylon buckle; stock is limited due to high demand.

Main features

Key features designed for reliable carry, quick access, and simple integration with tactical gear:

- **Adjustable nylon buckle closure:** Secure retention and fast opening when needed.
- **Multifunction pocket:** Extra space for small tools, cleaning items, or spare rounds.
- **Elastic magazine separators:** Keep three magazines organized and prevent shifting.
- **Dual-use: modular or belt:** Attach to MOLLE-style systems or wear on a belt.
- **Green color:** Low-visibility in natural environments for tactical and field use.
- **Water-resistant material:** Helps protect magazines in damp conditions.
- **Fade-resistant finish:** Maintains appearance after regular use.

How to use / When it’s useful

Use the pouch on a tactical belt for patrols or at the range, or attach it to modular webbing for mission kits and rucksacks. It fits standard M-16 and AR-70/90 magazines and similar-sized magazines when compatible.

Quick answer: fit it to a belt or MOLLE platform and secure the buckle for immediate access.
In most cases, use the elastic separators to keep magazines indexed and the multifunction pocket for small accessories during training or duty shifts.

Care and notes

Basic care keeps the pouch functional and long-lasting; check fit and attachment before operational use.

- Wipe clean with a damp cloth and mild soap; allow to air dry.
- Check magazine fit before use; not all non-standard magazines will match perfectly.
- Ensure buckles and attachment points are secured before movement.
- Store in a dry place to prolong the material and color life.

FAQ

Q: Is this pouch compatible with magazines other than M-16 and AR-70/90?

A: It is primarily designed for M-16 and AR-70/90 magazines but can fit other magazines of similar size. Always check fit before relying on it in the field.

Q: Is the material water-resistant?

A: Yes. The pouch uses water-resistant fabric to help keep magazines dry in wet conditions, though it is not fully waterproof for submerged use.

Q: How do I adjust the nylon closure?

A: The closure tightens and loosens via the nylon buckle; slide the strap to set the retention level that holds your magazines securely yet allows quick access.

Q: Will the green color fade quickly?

A: The colour is treated to resist fading under normal use. Prolonged exposure to harsh sunlight may gradually affect any fabric finish.

Q: Can I attach this to a tactical belt or plate carrier?

A: Yes. The pouch is compatible with most tactical belts and can be mounted on modular webbing systems for flexible carry options.

Q: How many magazines does it hold and how are they kept in place?

A: It holds three magazines. Elastic separators keep each magazine organized and reduce movement for faster reloads.

Tip: Choose the pouch if you need a three-mag solution that works as a belt pouch or modular attachment. Check magazine compatibility and browse related tactical and military surplus items to complete your loadout.
