Product short description:

EXAGON XTAC knee and elbow pads offer reliable protection and comfort for athletes and outdoor enthusiasts. They are designed for users who need secure joint coverage while maintaining freedom of movement.

- **Material:** Made from high-quality materials for durable, long-lasting protection.
- **Use:** Suitable for sports, outdoor activities and training sessions.
- **Fit:** Ergonomic shape conforms to knees and elbows for a secure, stable fit without restricting movement.
- **Features:** Lightweight, breathable and easy to put on.

Product description:

Product overview

The EXAGON XTAC knee and elbow pad set is a protective gear kit designed for workers, athletes, and tactical professionals who need dependable impact protection without limiting movement. This is a pair of ergonomic knee and elbow pads built for duty, tactical use, police

work, construction, and outdoor sports.

Definition: EXAGON XTAC pads combine a hard thermoplastic polyurethane shell with high-density foam and adjustable Velcro fastening for stable, comfortable protection.

Main features

Compact, durable construction with materials chosen for impact resistance, comfort, and long service life.

- **Ergonomic shape**: Contoured design that follows natural body curves for stable, comfortable fit.
- **Thermoplastic polyurethane (TPU) outer shell**: Rigid, non-slip protective shell with 6 heavy-duty eyelets for extra strength.
- **High-density foam padding**: 10 mm inner foam for shock absorption, covered in 400D nylon for abrasion resistance.
- **Inner polyester mesh with neoprene**: Concave inner surface lined with polyester mesh and neoprene anti-slip to keep pads in place over clothing.
- **Quick-release Velcro fastening**: Fast to put on and remove, and adjustable to fit a range of sizes.
- **Set includes knees and elbows**: Sold as a matching pair for both knees and elbows.

How to use / When it’s useful

Quick answer: Wear the pads over pants or sleeves so the concave inner side contacts the garment, then secure with the Velcro straps for a snug fit. They suit construction sites, tactical training, mountain biking, and other high-impact activities.

In most cases, position the pads so the shell covers the main impact zone, adjust the straps to prevent slipping, and check fit before intense activity. These pads are useful for military surplus buyers, police duty equipment, and anyone needing reliable, duty-grade protection.

Care and notes

Basic care extends the life of the pads and preserves materials—clean gently and store dry.

- Wipe with a damp cloth and mild soap if needed; avoid harsh chemicals and solvents.
- Air dry only; do not tumble dry or expose to direct heat sources for long periods.
- Adjust fit with the Velcro straps; check straps and eyelets regularly for wear.
- Available in limited quantities due to high demand; check size/fit before purchase.

FAQ

Q: Are EXAGON XTAC knee and elbow pads adjustable?

A: Yes. The quick-release Velcro system allows easy adjustments to fit different leg and arm sizes and to secure the pads over clothing.

Q: What materials are used in these pads?

A: The outer shell is thermoplastic polyurethane (TPU) non-slip material, the padding is 10 mm high-density foam with a 400D nylon cover, and the inner lining is polyester mesh with neoprene anti-slip.

Q: Are these pads suitable for tactical or police use?

A: They are designed for duty and tactical scenarios where impact protection and mobility are needed. Evaluate them against your specific operational requirements.

Q: How should I clean the pads?

A: Wipe with a damp cloth and mild soap, then air dry. Avoid machine washing, bleach, or aggressive detergents to prevent material damage.

Q: Do the pads come as a set or sold separately?

A: The product is supplied as a set including both knee and elbow pads, sold together for matched protection.

Q: Are there different sizes available?

A: The pads feature adjustable Velcro fastening to fit a range of sizes. If you need a very specific fit, check measurements and try them on over your usual work or sports clothing.

Tip: Choose the correct fit by trying the pads over the clothing you'll wear during use; select the variant that best matches your activity (tactical, duty, or sport) and browse related protective gear to complete your setup.
