Product short description:

Peltor shooting range earmuffs providing reliable hearing protection for range use—suitable for professionals and shooting enthusiasts who need comfort and safety.

- **Design:** Lightweight, ergonomic profile for extended wear without discomfort.
- **Use:** Intended for shooting range sessions; ideal for professionals and hobbyists.
- **Noise reduction:** Advanced noise-reducing technology attenuates loud sounds to help maintain focus on shot placement.
- **Fit:** Padded, adjustable earcups offer a secure, personalized fit.

Product description:

Product overview

The Peltor shooting-range earmuffs are hearing protectors designed for target shooting, range training, tactical drills and duty use. They suit hobby shooters, law enforcement personnel and anyone needing reliable ear protection during impulse noise activities.

Definition: Peltor Shot Gunner earmuffs provide passive hearing protection with an average attenuation of Att. Med. A500 HZ 26.4 dB. They are foldable, one-size adjustable and finished in black for a professional look.

Main features

Compact, comfortable and practical hearing protection built for range and tactical environments.

- **Model:** Peltor Shot Gunner (Att. Med. A500 HZ 26.4 dB).
- **Noise reduction:** Average attenuation 26.4 dB to reduce loud impulse sounds.
- **Foldable design:** Collapses for easy transport and storage.
- **Adjustable one-size:** Headband adjusts to fit most head sizes for a secure fit.
- **Color:** Black — discreet and professional for tactical, police or duty use.
- **Comfort-focused:** Designed for comfortable wear during extended range sessions.

How to use / When it’s useful

Use these earmuffs at shooting ranges, during firearm training, hunting, tactical exercises or any activity with sudden loud noises. They are suitable for recreational shooters, duty personnel and buyers of military surplus/tactical gear.

Quick answer: Put the earmuffs over your ears and adjust the headband until they sit snugly and comfortably. In most cases: ensure a good seal around the ears for optimal protection and fold them for transport between ranges or in your gear bag.

Care and notes

Basic care extends service life and keeps performance consistent.

- Inspect cushions and headband before each use; replace if damaged or worn.
- Wipe surfaces with a damp cloth; avoid solvents or soaking the pads.
- Store folded in a dry place away from extreme heat or sunlight.
- Ensure a correct fit each time—poor fit reduces attenuation effectiveness.

FAQ

Q: What is the noise reduction level?

A: The earmuffs have an average attenuation of Att. Med. A500 HZ 26.4 dB, suitable for shooting-range impulse noise reduction.

Q: Will these fit my head?

A: Yes. The one-size adjustable headband is designed to fit most head sizes and can be tightened or loosened for comfort.

Q: Are the earmuffs easy to carry?

A: Yes. The foldable design makes them compact for transport and convenient to store in a range bag or gear pack.

Q: What color are they?

A: They are black, offering a discreet and professional appearance for tactical, police or duty use.

Q: Are these suitable for beginners?

A: Absolutely. They are simple to use and comfortable for new shooters as well as experienced users.

Q: Is stock limited?

A: Availability can vary. If the product page shows limited stock, consider adding to your cart to reserve a pair while supplies last.

Tip: Choose the right fit before purchase and check related tactical and duty hearing protection items to compare features and find the best match for your range, police or military surplus needs.
