Product short description:

Polished chrome-plated brass office base with a single mounting socket, combining refined style and practical stability. Designed for professionals who want a tasteful, functional base for desks, displays or fixtures.

- **Material:** Brass with a polished chrome-plated finish for a modern, durable appearance.
- **Mounting:** Single mounting socket to support a pole or similar fixture securely.
- **Use:** Suitable for offices, reception areas and professional displays.
- **Benefits:** Stable, versatile and easy to integrate with existing furnishings.

Product description:

Product overview

The Base da Ufficio Ottone Cromato Lucido 1 Innesto is a polished chrome-plated brass office base designed for commercial and professional workspaces. It suits offices, reception areas, and

stands where a stable, attractive support is needed for poles or fittings.

Definition: a heavy, single-socket office base with a polished brass-chrome finish and a cast-iron core for stability.

Main features

Solid construction and clean lines make this base both decorative and functional for a range of indoor uses.

- **Material:** Polished chrome-plated brass for a refined look and long service life.
- **Heavy cast-iron core:** 29 cm diameter core provides strong stability.
- **Socket size:** Single-socket mount for 22 mm diameter poles or fittings.
- **Length:** 27 cm overall length.
- **Weight:** 10 kg for reliable resistance to tipping.
- **Finish:** Shiny chrome-brass appearance that enhances professional interiors.

How to use / When it’s useful

Quick answer: use this base to secure a pole, post, or fitting with a 22 mm diameter in office or display settings. It works well where a stable, visible support is needed without bulky hardware.

In most cases, place the base on a flat, level surface and insert the pole into the single socket; the 10 kg weight and 29 cm cast-iron core help keep the assembly steady. Suitable for reception desks, display stands, duty stations, and similar indoor uses where a neat, durable support is required.

Care and notes

Simple care will keep the chrome-plated brass finish looking good and preserve the base’s stability.

- Clean with a soft cloth and mild detergent; avoid abrasive cleaners that could scratch the finish.
- Handle with care when moving—product weight is 10 kg.
- Ensure the supporting surface is flat and stable before use.
- Designed for indoor use; protect from prolonged exposure to moisture to prevent corrosion of metal parts.

FAQ

Q: What are the base dimensions?

A: The base has an overall length of 27 cm and a socket (calibre) designed for 22 mm diameter

poles.

Q: What is the core made of?

A: The internal core is heavy cast iron with a diameter of 29 cm, which adds stability and weight to the base.

Q: How much does the base weigh?

A: The base weighs 10 kg, providing firm support for mounted poles or fittings and reducing the risk of tipping.

Q: Is the base available in other finishes?

A: Currently this model is offered only in polished chrome-plated brass finish (ottone cromato lucido).

Q: Is assembly difficult?

A: No. The base is designed for straightforward installation: place on a flat surface and insert the pole into the single socket. No special tools are typically required.

Q: Can this be used in a police, duty, or tactical environment?

A: The base is a general-purpose indoor support suitable for professional settings such as offices, reception areas, and duty stations. Check specific operational requirements before use in specialized tactical environments.

Tip: Choose the correct socket size (22 mm) for your pole or fitting and consider browsing related bases and accessories to match finish and functionality for your workspace needs.
