Product short description:

Polished chrome-plated brass office base with three connection points, designed for professionals and home offices that want a neat, professional workspace accent.

- **Material:** Brass core with a chrome-plated coating for stability and long-lasting appearance.
- **Finish:** High-gloss polished chrome for a modern look that is simple to clean.
- **Connections:** Three connection points to route cables, secure small devices or attach compatible accessories.
- **Use:** Keeps desks, reception areas and workstations organized while adding a subtle, refined detail.

Product description:

Product overview

The Polished Chrome-Plated Brass Office Base with 3 Mounting Sockets is a sturdy, visually

refined support designed for offices, shops, and equipment displays. It suits buyers who need a stable, corrosion-resistant base for desks, stands, or display fittings.

Definition: a chrome-plated brass base with a heavy cast-iron core and three mounting sockets for reliable support and neat appearance.

Main features

Quality materials and practical dimensions make this base a reliable choice for general office use and for retailers of tactical, military surplus, or police/duty equipment.

- **High-quality material:** Polished chrome-plated brass finish for corrosion resistance and a professional look.
- **Heavy core:** Cast-iron core with a 29 cm diameter for strong stability.
- **Bracket size:** Bracket height 27 cm with a 22 mm gauge, compatible with standard fittings.
- **Three mounting sockets:** Three innesti allow secure and simple attachment of poles or fixtures.
- **Weight:** 12 kg — heavy enough to prevent tipping while still manageable for positioning.

How to use / When it’s useful

Use this base to support table legs, display poles, or small equipment stands in reception areas, offices, showrooms, or retail counters. It works well where a clean, durable appearance is important.

Quick answer: the base is designed for easy mounting of poles or fixtures via the three sockets. In most cases, it fits standard 22 mm fittings and provides a stable footprint thanks to the cast-iron core.

Care and notes

Simple care extends finish life and maintains stability; handle the base carefully due to its weight and secure fittings tightly during installation.

- Wipe clean with a soft cloth; avoid abrasive cleaners to protect the polished finish.
- Check and tighten mounts after installation to ensure safe support.
- Handle with care when moving; 12 kg weight may require two people for safe lifting.

FAQ

Q: What are the base dimensions?

A: The cast-iron core measures 29 cm in diameter. The bracket height is 27 cm and the bracket gauge is 22 mm.

Q: How much does the base weigh?

A: The base weighs 12 kg, providing a stable support without being excessively heavy to move short distances.

Q: Is it corrosion resistant?

A: Yes. The polished chrome-plated brass finish offers good resistance to corrosion when cleaned and maintained properly.

Q: Is it easy to install?

A: Yes. The three mounting sockets are designed for quick and simple installation. Ensure fittings are compatible with the 22 mm gauge.

Q: Can it be used in retail or tactical equipment displays?

A: Yes. Its durable construction and professional finish make it suitable for office settings and retail displays, including tactical, military surplus, or police/duty shops.

Q: Are there any handling precautions?

A: Handle carefully when lifting due to the 12 kg weight. Secure all mounted components and avoid using abrasive cleaners on the finish.

Tip: Choose the right bracket size and check compatibility with your fixtures before purchase; browse related bases and mounting accessories to match your display or duty setup.
