Product short description:

Green knee and elbow pad set for outdoor sports enthusiasts. Comfortable, protective gear suited to cycling, skateboarding, rollerblading and other active pursuits.

- **Material:** High-quality construction for durability and comfort.
- **Use:** Suitable for cycling, skateboarding, rollerblading and general outdoor activities.
- **Fit:** Ergonomic shape ensures freedom of movement and a secure fit.
- **Protection:** Impact-absorbing padding offers reliable shock resistance.
- **Ventilation:** Breathable design helps keep skin cool and dry during activity.

Product description:

Product overview

The Set Ginocchiere Gomitiere Verdi is a protective knee and elbow pad set designed for people who need joint protection during training, airsoft, tactical drills or military training. Definition: a paired set of knee and elbow guards with a hard PVC shell and adjustable straps for secure fit.

Built for tactical, military surplus and duty use, this set balances impact protection with comfort for long sessions. It is suitable for civilian sports, police and outdoor activities where joint protection is required.

Main features

Key features focus on durable materials, secure fastening and ergonomic fit to protect knees and elbows during impacts.

- **High-resistance PVC shell:** hard outer layer designed to absorb and spread impact.
- **Double Velcro adjustment:** two Velcro straps with steel-ring attachment for a stable, customizable fit.
- **Ergonomic design:** shaped to follow body contours for comfort during extended wear.
- **Versatile use:** suitable for training, airsoft, military training, tactical drills and general workouts.
- **Coverage size:** each pad measures approximately 22 x 24 cm for broad protection of knee and elbow areas.
- **Lightweight construction:** made to protect without significantly restricting movement.

How to use / When it’s useful

Quick answer: wear the knee pads on the knees and the elbow pads on the elbows, tighten the Velcro straps until the pads sit firmly but comfortably. Use them whenever you expect hard contact with the ground or obstacles.

In most cases, these pads work well for airsoft sessions, tactical drills, military training and high-impact workouts where joint protection reduces the risk of bruises and scrapes. They are also suitable for routine duty tasks that involve kneeling or crawling.

Care and notes

Simple care keeps the pads functional and hygienic; clean gently and inspect fittings before use.

- Wipe with a damp cloth and mild soap if needed; avoid aggressive chemical detergents.
- Air dry completely before storage; do not machine wash or tumble dry.
- Check Velcro straps and steel rings regularly for wear and secure fit before each use.
- Replace pads if the PVC shell is cracked or any fastening component is damaged.

FAQ

Q: Are these pads one-size-fits-all?

A: The double Velcro adjustment allows a wide range of fits, but body shape varies. Try them on to confirm comfort and secure fit before strenuous use.

Q: Can I use the set for sports other than airsoft?

A: Yes. The pads are versatile and suitable for many activities like tactical training, gym drills, gardening or any task that risks impact to knees and elbows.

Q: How do I clean the pads?

A: Wipe with a damp cloth and mild soap, then air dry. Avoid harsh detergents and machine washing to preserve the PVC shell and Velcro.

Q: Do they protect against strong impacts?

A: The high-resistance PVC shell is designed to reduce the force of impacts and abrasion. No pad can eliminate all injury risk; use them as part of overall safe practices.

Q: Are these suitable for police or duty use?

A: Yes, they are appropriate for duty and tactical scenarios where knee and elbow protection is needed, provided they meet your department's specific equipment rules.

Q: How much do they weigh?

A: The set is described as lightweight and intended not to hinder movement. If exact weight is required, please check the product listing or contact the seller for details.

Tip: Choose the right fit by testing the Velcro adjustment and ensuring the pads sit comfortably over joints. Browse related tactical and protective gear to complete your setup and compare variants for the best match to your activity.
