- **Organization:** Two main compartments, two front pockets and side compression straps for stability and order.
- **Use:** Ideal for trekking, camping and training missions.
- **Availability:** Limited stock.

Product description:

Product overview

The Exagon Adventure Black 50L is a tactical-style backpack designed for hikers, campers,

training and operational users who need organized carry, modular expansion and reliable comfort. Definition: a 50-litre tactical backpack with laser-cut MOLLE, a ventilated honeycomb back and a dedicated hydration sleeve for outdoor and duty use.

Built for order and load stability, it combines a sober black design with two main compartments, two quick-access front pockets, side compression straps and a quick-release waist belt. Limited stock available.

Main features

Key features that balance capacity, durability and modularity for tactical, military surplus and duty use.

- **50 L capacity** – room for clothing, tools, first aid and multi-day essentials.
- **Laser-cut MOLLE** – lightweight, low-profile attachment points for pouches and accessories.
- **Ventilated honeycomb back** – improved airflow to reduce heat and sweat on long marches.
- **Hydration sleeve** – fits common 2–3 L bladders for hands-free drinking.
- **Quick-release waist belt** – transfers weight to hips and stabilizes the load.
- **Two main compartments + two front pockets** – internal sleeves, pockets and mesh for fast organization.
- **Reinforced construction** – high-tenacity water-repellent fabric, double-slider zippers and a reinforced base.

How to use / When it’s useful

Quick answer: use this pack for day hikes, 48–72 hour treks, training and light operational tasks where modularity and a structured layout speed access to gear. The laser-cut MOLLE lets you configure the pack for reconnaissance, logistics or general outdoor duty without changing backpacks.

In most cases, set heavier items low and close to the spine, use the hydration sleeve for continuous drinking, and attach utility pouches on the MOLLE for items you need fast. The black, low-profile design also works for urban use by professionals who prefer a duty-style pack.

Care and notes

Basic care keeps the pack functional and extends service life; follow these simple steps and warnings.

- Brush off dirt and wipe with a damp cloth and mild detergent; do not machine wash.
- Not fully waterproof: use a rain cover for prolonged heavy rain or immersion.
- Air dry in the shade and store dry in a ventilated place; avoid direct heat sources.

- Check seams, straps and buckles regularly and replace worn components when needed.

FAQ

Q: Is the pack waterproof?

A: The fabric is water-repellent and resists light rain, but it is not fully waterproof. We recommend a rain cover for prolonged or heavy rain.

Q: Which hydration bladders fit the sleeve?

A: The sleeve fits common hydration bladders, typically 2–3 litres. Verify tube length and bite-valve position for best fit.

Q: Can I carry a laptop inside?

A: Yes, there is a sleeve in the main compartment that can hold a laptop; use a protective case for extra shock protection.

Q: Is the waist belt removable?

A: The waist belt uses a quick-release buckle for rapid adjustments; removability can vary by production batch—ask us at order time if you need it fully removable.

Q: Is it suitable for multi-day trekking?

A: Yes. With correct packing and optional MOLLE pouches the 50 L capacity supports 48–72 hour outings for most users.

Q: Are MOLLE accessories compatible with standard pouches?

A: The laser-cut MOLLE is designed to be low-profile but is compatible with most standard MOLLE pouches and attachments.

Tip: Choose the right setup for your trip: pick a hydration bladder size, add MOLLE pouches for fast-access items, and consider a rain cover and internal organizers. Browse related tactical pouches, hydration solutions and rain covers to complete your kit.
