Product short description:

Adjustable multi-use rotating loop for organizing and securing gear - ideal for home, workshop or field use. Designed for flexibility, it combines a compact profile with durable construction to simplify storage and mounting tasks.

- **Material:** Durable construction built to withstand regular use.
- **Use:** Organize cables, hang tools or securely fasten small items.
- **Rotation:** 360-degree swivel for full-range positioning and easier access.
- **Fit:** Adjustable design for mounting on a variety of surfaces.

Product description:

Product overview

The Adjustable Multi?Purpose Rotating Belt Loop is a compact mounting accessory for professionals and outdoor users who need a secure way to attach gear to a belt or MOLLE webbing. It suits tactical users, military surplus setups, law?enforcement duty belts and outdoor enthusiasts seeking a reliable connector.

Definition: a rotating, adjustable pass-through loop that fits 4–6 cm belts and attaches to MOLLE systems for secure gear mounting.

Main features

Compact, durable and easy to fit, this rotating loop offers dual compatibility and a secure locking system for everyday and field use.

- **Dual fit:** Works with belts 4–6 cm wide and with MOLLE webbing.
- **Double locking system:** Two-step secure closure to reduce accidental openings.
- **Compact size:** 5 cm (W) x 9.5 cm (H) x 1.5 cm (D).
- **Durable materials:** Built to resist wear from regular use.
- **Easy to use:** Intuitive design allows quick installation and adjustment.

How to use / When it’s useful

Quick answer: slide the loop onto a 4–6 cm belt or weave it into MOLLE webbing, then close the two locking points to secure your setup. In most cases, you can mount small pouches or compatible accessories where a stable, rotating attachment is needed.

This passante is useful for duty, tactical and general outdoor applications where a low-profile, secure connector is required. It is suitable for professionals and hobbyists who need a reliable mounting point on belts or MOLLE panels.

Care and notes

Simple care extends service life and keeps the locking system working reliably. Check the fit and locks regularly before use.

- Inspect locks and fittings for wear before each use.
- Keep clean and free of sand or debris that might jam the mechanism.
- Ensure belt width is 4–6 cm for correct fit.
- Avoid overloading beyond the intended purpose to prevent strain on the locking system.

FAQ

Q: What are the dimensions of the passante?

A: The dimensions are 5 cm wide x 9.5 cm high x 1.5 cm deep. These compact measurements suit low-profile setups.

Q: Will it fit my belt?

A: It fits belts between 4 and 6 cm in width. Confirm your belt width before purchasing to ensure a

correct fit.

Q: Can it be used on MOLLE systems?

A: Yes. The design allows attachment to MOLLE webbing, making it compatible with many tactical and military surplus packs and panels.

Q: Is it easy to use for beginners?

A: Yes. The rotating design and adjustable fit make it straightforward to install and operate, even for users new to tactical gear.

Q: How durable is the passante?

A: It is made from materials intended for regular use and wear resistance. Regular inspection and proper care will maintain durability.

Q: How does the double locking system work?

A: The passante uses two locking points to secure the closure and reduce the risk of accidental opening. Always verify both locks are engaged after installation.

Tip: Choose the correct size for your belt (4–6 cm) and check compatibility with your MOLLE setup. Browse related tactical and duty belt accessories to complete your gear setup without overloading any single attachment.
