Product short description:

The Coltello ParaKnife Pro 4.0 UST is a reliable outdoor knife for campers, hikers and emergency kits. It offers practical, dependable performance for field use and outdoor adventures.

- **Material:** High-quality stainless steel blade for precise, durable cutting.
- **Handle:** Ergonomic design provides a secure, comfortable grip even in tough conditions.
- **Carry:** Includes a practical sheath for safe storage and easy transport.
- **Use:** Ideal for camping, hiking and emergency situations.

Product description:

Product overview

The ParaKnife Pro 4.0 UST by Ultimate Survival Technologies is a fixed-blade survival and tactical knife designed for outdoor enthusiasts, campers, and professionals who need a reliable cutting tool. It suits applications from campsite tasks to emergency preparedness and light tactical use.

Definition: The ParaKnife Pro 4.0 UST is a partially serrated fixed-blade knife with survival features built into the handle.

Main features

Compact, lightweight construction with survival-oriented accessories and a corrosion-resistant blade.

- **Partially serrated 440 A stainless steel blade** for a mix of slicing and sawing tasks.
- **Black oxide finish** for added surface protection and reduced glare.
- **Para tinder-wrapped handle (1.80 m)** — provides a secure grip and removable tinder for fire-starting.
- **Includes ferrocerium firestarter and whistle** for emergency signaling and ignition.
- **Black nylon sheath** for safe, convenient carry.
- **Self-adjusting lock** with an Allen (hex) key supplied for tightening and maintenance.
- **Compact dimensions and weight:** total length 22 cm, handle length 12 cm, weight 132 g.

How to use / When it’s useful

Use the ParaKnife Pro 4.0 for general camp tasks (food and cordage cutting), emergency rescue and survival tasks (fire prep, signaling), and tactical or duty applications where a compact fixed blade is needed. The partially serrated edge helps with fibrous materials while the plain edge handles finer cuts.

Quick answer: carry it in the nylon sheath and use the ferro rod and para tinder for rapid fire-starting. In most cases, keep the para tinder wrapped on the handle until you need it, and always secure the knife in its sheath when not in use.

Care and notes

Regular basic maintenance keeps the knife reliable in the field.

- Clean and dry the blade after use to reduce surface wear despite stainless construction.
- Store the para tinder dry and replace if damaged; it is intended for emergency fire-starting.
- Use the supplied Allen key to check and adjust the self-adjusting lock as needed.
- Keep out of reach of children and handle the blade with care.

FAQ

Q: What is the total length and blade/handle size?

A: Total length is 22 cm with a handle length of 12 cm. The blade is the remaining portion of the total length (22 cm total).

Q: Is the blade corrosion resistant?

A: Yes, the blade is 440 A stainless steel, which offers good resistance to corrosion when cleaned and dried after use.

Q: Can I remove the para tinder from the handle?

A: Yes, the para tinder wrap can be used as emergency tinder. It is wrapped around the handle for grip and can be removed if needed.

Q: What accessories are included with the knife?

A: The knife comes with a ferrocerium firestarter, a whistle, a black nylon sheath, and an Allen (hex) key for the lock.

Q: How does the self-adjusting lock work?

A: The lock is designed to be tightened or adjusted using the supplied Allen key to ensure a secure fit and stable blade when carried.

Q: How much does the knife weigh?

A: The ParaKnife Pro 4.0 UST weighs 132 grams, making it lightweight and easy to carry for hiking, camping, or tactical duty.
