Product short description:

Dual-use thigh kit with double magazine pouch in green, designed for users who need practical, versatile magazine carry. Made from durable materials with an ergonomic profile for comfortable wear and easy handling. Ideal for outdoor enthusiasts, range users, and anyone who needs tidy, accessible magazine storage on the move.

- **Material:** Durable construction for reliable performance.
- **Design:** Dual-use configuration offering multiple carry options and a secure thigh fit.
- **Access:** Two magazine pouches provide quick, secure access for efficient reloads.
- **Use:** Suitable for outdoor activities, range work, or organized loadouts.
- **Color:** Green finish for a tactical, low-key appearance.

Product description:

Product overview

The Kit Cosciale Doppio Uso con Doppio Porta Caricatore Verde is a dual-use thigh rig with a double magazine pouch, designed for users who need a practical, adaptable carry solution for outdoor activities or operational duty. It suits tactical, police, and military surplus setups where fast access and secure carry are required.

Definition: a removable thigh-mounted support that can be worn on the belt or on the leg, holding two magazines securely. The kit combines adjustable magazine flaps, anti-slip thigh straps, and water-resistant materials for reliable field use.

Main features

Compact, adjustable, and built for repeated use in the field; key features support compatibility and comfort.

- **Dual-use design:** Removable thigh support that also mounts directly to a belt.
- **Double anti-slip thigh straps:** Two nonslip straps keep the buckles and kit in place during movement.
- **Adjustable, removable magazine flaps:** Height-adjustable flaps fit AR70/90 and M16 magazines and can be removed as needed.
- **Durable, water-resistant materials:** Built to resist wear and light moisture in adverse conditions.
- **Ergonomic and lightweight:** Designed for comfort during extended wear and to reduce fatigue on long patrols or hikes.

How to use / When it’s useful

Attach the kit to your belt using the removable support for a low-profile belt carry, or secure it on the thigh with the double anti-slip straps for a thigh rig setup. Quick answer: use it on the belt for everyday carry or on the thigh when you need faster access and less interference with body movement.

In most cases, the adjustable magazine flaps will fit common AR70/90 and M16-type magazines; remove or lower the flaps to adapt to other magazine shapes. This kit is useful for tactical training, police duty, hunting, and outdoor or survival activities where secure magazine storage and quick retrieval matter.

Care and notes

Follow simple care to keep the kit functional and safe for prolonged use.

- Wipe clean with a damp cloth; avoid machine washing to preserve straps and buckles.
- Air dry away from direct heat or prolonged sunlight to prevent material degradation.
- Check straps, buckles, and stitching regularly for wear and re-secure adjustments before each use.

- Avoid overloading the pouches beyond their intended magazine capacity to prevent stress on seams.

FAQ

Q: Is the kit compatible with magazines other than AR70/90 and M16?

A: Yes. The magazine flaps are height-adjustable and removable to accommodate a range of magazine shapes. Always verify fit with your specific magazine model before field use.

Q: Is the thigh support easy to remove and attach to a belt?

A: Yes. The coscial (thigh) support is designed to be quickly detached and mounted on a belt for direct carry. Ensure clips and fastenings are secure after reattachment.

Q: Are the thigh straps adjustable?

A: Yes. The double anti-slip thigh straps are adjustable to provide a snug, stable fit and to prevent buckle loosening during movement.

Q: Is the kit waterproof?

A: The kit is made from water-resistant materials suitable for wet weather and light exposure. It is not guaranteed fully waterproof for prolonged immersion.

Q: How heavy is the kit?

A: The kit is described as lightweight and designed not to add excessive bulk or weight. No specific weight is provided; actual feel will depend on mounted magazines and accessories.

Q: Is this suitable for police or duty use?

A: Yes. The design supports tactical and duty applications, offering secure magazine carry and quick access for police, security, or military-style use.

Tip: Choose the variant and attachment style that matches your belt width and carry preference, and check related tactical and military surplus accessories to complete your setup without overloading the kit.
