Product features:

Product short description:

Foldable dump pouch in vegetated camouflage, made for outdoor and airsoft enthusiasts who need a compact, lightweight way to collect empty magazines and small accessories. Practical and discreet, it helps keep gear organized during field use.

- **Material:** Durable vegetated fabric that blends with natural surroundings.
- **Use:** Designed to hold empty magazines and small items during outdoor activities.
- **Attachment:** Quick-attach fastening for secure belt or backpack mounting.
- **Storage:** Folds flat for easy stowage when not in use.

Product description:

Product overview

The Sacca Pieghevole Porta Caricatori Esausti Vegetata - Dump Pouch is a foldable pouch in Vegetata camouflage designed for tactical operators, police, and duty personnel who need a fast, compact solution for collecting spent magazines and casings. Definition: a compact, fold-flat dump pouch for storing empty magazines and shell casings during operations.

Built for field use, it combines low weight with rugged materials (Cordura 1000D exterior, Nylon 210T lining) and mounts to MOLLE or belts for reliable carry. It is suitable for tactical, military surplus, and police kit setups where quick magazine management matters.

Main features

Durable, compact and easy to deploy — key features that support fast magazine handling in dynamic situations.

- **Foldable design:** Packs flat and secures in a compact position when not in use to save space on your rig.
- **Single-hand quick release:** Pull, open and drop spent magazines or casings with one hand for rapid reload cycles.
- **Generous capacity:** Sized to hold a significant number of spent magazines or casings while remaining compact when folded.
- **Secure mounting:** MOLLE attachments and belt loops with double-security fastenings (hook-and-loop plus snap) keep the pouch stable during movement.
- **Rugged construction:** Cordura 1000D exterior and Nylon 210T lining with reinforced stitching for long-term wear resistance.
- **Reinforced opening:** Polyurethane stiffening band maintains the mouth shape for easy access and dumping.
- **Practical extras:** Elastic closure and drainage eyelets for quick drying and secure containment.

How to use / When it’s useful

Quick answer: mount the dump pouch on a rear or side MOLLE panel or on your belt, secure the fastenings, and use one hand to open and deposit spent magazines or casings. Its fold-flat design keeps your loadout compact until you need rapid access.

In most cases, operators use this pouch during drills, ranges, or dynamic entries where quick spent-magazine management improves reload speed and keeps gear tidy. It also serves well in police duty and military surplus loadouts for general-purpose storage of small items.

Care and notes

Simple care extends service life and ensures reliable performance in the field.

- Clean with a damp cloth; avoid harsh chemicals or bleach to protect Cordura and lining.
- Air dry completely before storage; drainage grommets help remove water.
- Inspect MOLLE and belt attachments regularly and ensure hook-and-loop and snaps are secured before use.
- Do not overload beyond normal spent-magazine use to avoid strain on stitching and fastenings.

FAQ

Q: What are the pouch dimensions when folded?

A: Folded external dimensions are 24 cm length x 10 cm height x 4 cm depth. These compact dimensions make it easy to stow on a belt or MOLLE panel.

Q: What materials are used?

A: The exterior is Cordura 1000D and the lining is Nylon 210T. These materials offer abrasion resistance and reliable field performance.

Q: Is the pouch MOLLE compatible?

A: Yes. It includes MOLLE attachment points and belt loops with double-security fastenings (hook-and-loop plus snap) for stable mounting.

Q: Can I use it for items other than spent magazines?

A: Yes. The pouch is versatile and can hold shell casings or other small items, making it useful beyond just magazine recovery.

Q: Is the pouch weather resistant?

A: It is designed to resist adverse conditions, abrasion and tactical wear; the materials and reinforced construction improve durability in wet or rough environments.

Q: What are the open dimensions?

A: When opened the pouch measures 24 cm length x 28 cm height, providing a wide mouth and adequate volume for spent magazines and casings.

Tip: Choose the mounting option that fits your rig (MOLLE or belt) and check attachments before use. Browse related tactical and military surplus accessories to complete your setup and ensure the best fit for your role.
