Product short description:

The GA 3 pepper spray pistol is a non-lethal self-defense device designed for personal protection. It provides a straightforward option for civilians seeking a means to deter threats in close encounters.

- **Model:** GA 3 pepper spray pistol
- **Type:** Non-lethal defensive spray device
- **Use:** Intended for personal protection and close-range deterrence
- **Safety:** Follow instructions and training; use responsibly
- **Legal:** Check local laws and restrictions before purchase or carry

Product description:

Product overview

The Pistola al Peperoncino Autodifesa GA 3 is a compact two-shot pepper gel pistol designed for people seeking a reliable self-defense tool for personal protection, tactical use, or duty situations. It is aimed at civilians, security professionals and police officers who need a discreet, easy-to-

carry deterrent.

Definition: a handheld pepper-gel launcher that delivers an irritant gel containing oleoresin capsicum to temporarily incapacitate an attacker and mark them for later identification.

Main features

Simple, robust design focused on accuracy, portability and user control.

- **Rapid output:** Reaches a speed of 180 km/h within the first 3 meters for a fast, direct impact.
- **Wind-resistant spray:** Engineered to deliver a straight, non-nebulizing jet that performs better in breezy conditions.
- **Two powerful charges:** Twin end-mounted charges, each with a total of 6 grams of oleoresin capsicum for effective irritation to eyes, skin and airways.
- **Identification dye:** Gel is mixed with a reddish dye to help identify the aggressor after contact.
- **Compact dimensions:** 12 cm length × 8.5 cm height × 2.5 cm thickness for easy carry and concealment.
- **Ergonomic grip:** Ambidextrous anatomical handle suitable for users with smaller hands.
- **Carry-friendly:** Flexible clip for attachment to a pocket or belt; compatible with an optional laser sight (sold separately).

How to use / When it’s useful

Use in defensive situations where you need to stop or delay an aggressor at short range while creating time to escape. Quick answer: point at the target from a safe distance, press to fire one of the two gel charges, then retreat to safety.

In most cases, aim for the face to maximize the irritant effect and the marking dye; the compact size makes it suitable for everyday carry, duty belts or tactical kits. Practice handling (without firing) to become familiar with the grip and trigger motion.

Care and notes

Follow basic storage and handling rules to keep the device safe and ready for use.

- Store in a cool, dry place away from children and heat sources.
- Check local laws: carriage and use rules vary by jurisdiction and must be followed.
- Do not point at people unless in a genuine self-defense situation; the gel causes strong irritation to eyes, skin and airways.
- Keep the unit clean and inspect the clip and charges regularly; laser sight is sold separately.

FAQ

Q: How long does the oleoresin capsicum effect last?

A: The irritating effect can last up to about 45 minutes in many cases, which is usually enough time to get to a safe location and seek help.

Q: Is it legal to carry this pistol?

A: Laws vary by country and region. Check local regulations before purchasing or carrying the device to ensure compliance with police and public-safety rules.

Q: Is it difficult to use for a beginner?

A: No. The GA 3 is designed with an ergonomic grip and simple two-shot operation so even inexperienced users can handle it after brief familiarization.

Q: Does the product cause permanent injury?

A: The formulation produces strong but typically temporary irritation to eyes, skin and respiratory passages. It is intended to incapacitate rather than cause lasting harm.

Q: Is the laser sight included?

A: No. The laser sight is sold separately; the pistol is compatible with an aftermarket laser to improve aiming precision.

Q: What are the dimensions and weight?

A: The pistol measures 12 cm (length) × 8.5 cm (height) × 2.5 cm (thickness) and is described as lightweight for comfortable daily carry.

Tip: Choose the right variant for your carry style and check compatible accessories like holsters and a laser sight. Browse related tactical and police-grade personal protection items to build a complete self-defense kit.
