**Product features:**

**Product short description:**

The VH VJH8 Hybrid holster combines comfort and secure carry for licensed firearms users. Built for professionals and enthusiasts who want a discreet, reliable everyday holster.

- **Material:** Hybrid construction with a Kydex shell and leather backing for a balance of rigidity and comfort.
- **Design:** Ergonomic shape adapts to the body for stable, low-profile carry and quick, secure access.
- **Use:** Suitable for licensed carriers seeking discreet, dependable daily carry.
- **Comfort:** Leather contact points reduce chafing; materials are chosen for long-lasting wear.

**Product description:**

### Product overview

The Fondina VH VJH8 Hybrid is a slim, ambidextrous polymer holster designed for shooters who need a versatile carry solution for duty, tactical, or everyday use. It fits right- and left-handed users and supports inside-the-waistband (IWB), outside-the-waistband (OWB) and cross-draw

carry positions.

Definition: this is a black, injection-molded hybrid holster with an adjustable sight channel and a removable RSH tilt support for customizable carry. The holster balances low profile design and secure retention for a range of compatible pistols.

**Main features**

Key features that make the VH VJH8 Hybrid suitable for duty, tactical, and civilian carry:

- **Durable polymer construction:** Injection-molded black polymer for strength and low weight.
- **Slim-line profile:** Narrow, body-hugging design to reduce bulk while carrying.
- **Sight guide:** Integrated guide ensures a smooth, consistent draw.
- **Adjustable RSH support:** Removable tilt support lets you set the cant for comfort and access.
- **Ambidextrous, dual carry system:** Clip (tilt and ride height adjustable) and double-loop belt pass (also adjustable) for multiple mounting options.
- **Retention Level I:** Weapon retention via a friction bridge, adjustable with the included retention screw.

**How to use / When it’s useful**

Use the VH VJH8 Hybrid for concealed IWB carry, open OWB duty use, or cross-draw on either side. Install the clip or the double-loop belt pass depending on your belt and preferred ride height, then adjust the RSH support and retention screw for a secure, comfortable fit.

Quick answer: the holster is best when you need a low-profile, secure carry option that adapts to right- or left-handed use. In most cases, the sight guide and adjustable cant improve draw speed and consistent presentation for range work, training, or operational duty.

**Care and notes**

Simple care keeps the holster functioning reliably and maintains proper retention and fit.

- Clean with a damp cloth; avoid solvents that may damage polymer.
- Check and set the retention screw to a secure but easily releasable level for your firearm.
- Confirm compatibility with your pistol model before ordering.
- Ensure the clip or belt pass is correctly mounted and the belt is rated for duty/tactical use.
- Check local laws and department policies before carrying a loaded weapon.

## FAQ

**Q:** Which pistols are compatible with the Fondina VH VJH8 Hybrid?

**A:** Compatible models include Glock 31, Glock 32, Glock 38, Glock 43, Glock 43X, Glock 45, Para Ordnance P14, Sig Sauer 1911, Smith & Wesson 1911, and Springfield 1911. Always verify fit with your specific firearm and configuration.

**Q:** Is the holster suitable for left- and right-handed users?

**A:** Yes. The holster is designed for ambidextrous use and can be configured for right- or left-side carry, including cross-draw positions.

**Q:** What carry positions does it support?

**A:** The VH VJH8 Hybrid can be used IWB (inside-the-waistband), OWB (outside-the-waistband), on the right or left hip, and in cross-draw configuration using the removable hardware.

**Q:** What is the retention level and how is retention adjusted?

**A:** Retention is Level I, provided by a friction bridge on the holster. Retention is adjustable via the retention screw to fine-tune how tightly the holster holds the weapon.

**Q:** Can I adjust cant and ride height?

**A:** Yes. The product includes a clip with tilt and belt-height adjustment and a double-loop belt pass with the same adjustment range to set cant and ride height to your preference.

**Q:** What is the delivery time and availability?

**A:** Delivery is guaranteed within 20 days from the order date. Availability is limited, so order soon if you need this specific model.

**Tip:** Choose the variant that matches your firearm and preferred carry style, check fit before use, and browse related holsters and mounting accessories to complete your setup.
