Product features:

Product short description:

Ballistic smoke-lens glasses combining protective performance with a modern look. Ideal for outdoor activities, extreme sports, tactical use or everyday wear when eye protection and glare reduction are required.

- **Lenses:** Smoke lenses that improve visual clarity and reduce glare in bright conditions.
- **Protection:** Designed to shield eyes from flying debris and common environmental hazards.
- **Frame:** Lightweight, sturdy frame engineered for durability and frequent use.
- **Fit:** Ergonomic shape that conforms comfortably to the face for extended wear.

Product description:

Product overview

These Ballistic Smoke Lens Glasses are tactical eyewear designed for police, military units and technical professionals who need durable eye protection with a modern look. They combine ballistic-tested impact resistance, UV protection and all-day comfort for duty, training and field

work.

Definition: Ballistic smoke lens glasses are protective spectacles built to meet military impact standards and reduce glare while protecting eyes from UV radiation.

Main features

Built to military-tested standards and focused on comfort and practicality, these glasses suit tactical, military surplus and duty use.

- **Ballistic tested:** Compliant with STANAG 2920; lenses withstand impacts above 240 m/s (Stanag 4296 §5,6).
- **100% UV protection:** Lenses block UVA, UVB and UVC rays.
- **Anti-fog and anti-scratch:** OptiRock anti-fog coating on both sides and high-performance scratch resistance.
- **Comfort fit:** Adjustable-length temples, soft nose pad and soft temple tips to reduce slippage in prolonged use.
- **Smoke lenses in 4 colors:** Options to suit different light and tactical preferences.
- **Durable frame:** Matte black modern frame for a professional, low-profile appearance.
- **Included accessories:** Slip-on cord and soft pouch for storage and daily cleaning.

How to use / When it’s useful

Quick answer: Use these glasses for patrols, range work, field operations, technical tasks and other duty situations where ballistic-rated eye protection and UV blocking are needed. They are designed for tactical and military use as well as for professional technical roles.

In most cases, the smoke lenses reduce glare and improve visual comfort in daylight and mixed-light conditions. For very low-light environments, evaluate visibility before full duty use and consider task-appropriate eyewear if required.

Care and notes

Simple care keeps optics clear and maintains ballistic performance. Follow unit safety guidance and inspect lenses regularly for damage.

- Clean with a soft microfiber cloth and mild soap or lens cleaner; avoid abrasive materials and harsh solvents.
- Store in the supplied soft pouch to prevent scratches and damage during transport.
- Replace lenses or glasses if they become deeply scratched, cracked or otherwise compromised.
- Follow your department or unit safety procedures; eyewear is one element of protective equipment and should be used with other required PPE.

FAQ

Q: Are these ballistic smoke lens glasses suitable for everyday use?

A: Yes. Their modern design and 100% UV protection make them suitable for everyday wear, especially for those who want tactical-style eyewear with protective features.

Q: Do the smoke lenses work in low-light conditions?

A: The smoke lenses reduce glare and improve comfort in daylight and mixed light. In very low-light situations they can reduce brightness, so test them in your specific conditions before relying on them for night duty.

Q: Are the glasses adjustable for different face shapes?

A: Yes. They feature adjustable-length temples, a soft nose pad and soft temple tips to improve fit and reduce slippage during extended wear.

Q: What lens colors are available?

A: The smoke lenses are offered in 4 different colors to suit different light conditions and personal preference.

Q: Do they come with storage or cleaning accessories?

A: Yes. Each pair includes a slip-on cord and a soft pouch for storage and daily cleaning.

Q: What ballistic standard do these glasses meet?

A: They are tested in accordance with STANAG 2920 and demonstrated resistance to impacts above 240 m/s (Stanag 4296 §5,6). As with any protective gear, follow official safety protocols and inspect equipment before use.

Tip: Choose the lens color and fit that match your typical duty conditions; check fit with your helmet or headset if needed, and browse related tactical and military surplus eyewear to compare options before purchase.
