- **Design:** Modern, understated styling that maintains an elegant, professional look.
- **Features:** Practical pockets and sturdy closures for everyday practicality and comfort.
- **Use:** Versatile and durable — ideal for coping with inclement weather.

Product description:

Product overview

The Impermeabile di Servizio Libera Uscita Esercito Model 2016 is a military service raincoat for

personnel who need a durable, functional outer garment for duty, parade, or everyday wear. It suits users in military surplus, tactical, or duty/police roles who require weather protection with a formal appearance.

Definition: This is a two-piece raincoat system made of an outer jacket plus a non-self-supporting removable inner corpetto (liner) designed to be anchored to the jacket for added versatility and weather protection.

Main features

This raincoat combines formal tailoring with practical details for protection and wearability.

- **Structured jacket construction:** Outer jacket made from four front panels and one back panel with tailored yokes (carré) for a formal fit.
- **Reinforced rank epaulettes:** Double-fabric shoulder rank holders, internally reinforced with plastic support, finished with a hidden snap fastener.
- **Waterproof closures:** Front closure uses an anti-water zipper with double sliders mounted on 30 mm fabric plackets and covered by two outer storm flaps secured by five hidden snap buttons.
- **Functional pockets:** Laser-cut horizontal internal waist pockets on both front panels, approx. 180 mm opening, closed with anti-water zippers; internal pocket sacks approx. 250 mm deep.
- **Removable inner corpetto (liner):** Full-length front zipper with pull tab allows the corpetto to be anchored to the outer jacket for added insulation.
- **Identification panels and cuffs:** Laser-cut shield-shaped Velcro patches on both sleeves (left sleeve for nationality badge) and rectangular adjustable cuffs with hidden snap fasteners.
- **Branded details:** Silver collar stars on each collar tip and ESERCITO logo heat-sealed inside both pieces and on the shaped front chest insert.

How to use / When it’s useful

Use the outer jacket alone in mild wet weather or attach the removable corpetto for cooler conditions and added insulation. The corpetto zips into the jacket and can be removed quickly when not needed.

Quick answer: Attach the corpetto via its full-length zipper when extra warmth or wind protection is required. In most cases, wear the jacket by itself for lighter rain and the combined system for colder, windy, or prolonged rainy conditions.

Care and notes

Follow the garment label for washing and care to keep fabric performance and protective finishes intact.

- Follow washing instructions on the product label; machine wash only if the label allows.
- Close zippers and fasten snaps before cleaning to protect seams and zipper elements.
- Remove the inner corpetto before any specific dry-cleaning or repair operations if recommended on the label.
- Check size chart before ordering; cut and laser-finished edges may be less forgiving if altered.

FAQ

Q: What sizes are available for the Impermeabile di Servizio Libera Uscita Esercito Model 2016?

A: Available sizes vary by stock. Please consult the size chart provided on the product page to select the correct size for your chest and sleeve measurements.

Q: Can I wash this raincoat in a washing machine?

A: Follow the care instructions on the garment label. The product recommends following the label guidance to preserve water-resistant finishes and fabric integrity.

Q: Is the inner corpetto removable?

A: Yes. The inner corpetto is removable and attaches to the outer jacket by a full-length zipper, allowing quick removal or reattachment as needed.

Q: What materials are used in this raincoat?

A: The coat is made from water-resistant fabrics with reinforced plastic supports for epaulettes and quality anti-water zippers. Exact fabric composition is printed on the product label.

Q: Is this raincoat suitable year-round?

A: The two-piece design makes it versatile: wear the outer jacket alone in milder weather and add the corpetto for colder conditions. It is suitable for a range of climates when layered appropriately.

Q: How are ranks and badges attached?

A: Epaulettes are sewn into the shoulder seam and reinforced internally; Velcro shield-shaped panels are provided on both sleeves for secure attachment of badges (nationality badge on the left sleeve).

Tip: Choose the correct size using the size chart and consider ordering the variant that best matches your layering needs. Also check related military surplus and tactical outerwear items to complete your uniform or duty kit.
