Product short description:

Crispi Waterproof Shine Cream is a leather care cream that polishes and helps protect footwear from moisture and stains. Made for outdoor users and professionals, it's suitable for combat boots, dress shoes and everyday shoes that need a clean polished finish.

- **Brand:** Crispi
- **Use:** Polishes leather and provides water-repellent protection against light moisture and stains
- **Benefits:** Restores and enhances shine, conditions leather and helps extend footwear life
- **Application:** Easy to apply; absorbs quickly without leaving residue
- **Suitable for:** All types of leather; ideal for combat boots, dress and casual shoes

Product description:

Product overview

The Crispi Waterproof Shine Cream is a 100 ml jar of wax-based shoe and leather care, designed for people who need reliable protection and shine for footwear and gear—ideal for everyday wear,

tactical or duty boots, and police or military surplus items. Definition: a wax, oil and grease cream that repels water and nourishes leather.

It includes an integrated sponge for quick application, delivers water-repellent protection, and restores a polished look while helping prevent drying and cracking in leather accessories.

Main features

Practical, travel-friendly format with an easy-apply sponge; formulated to protect and polish most leather goods.

- **Water-repellent formula:** Wax, oil and grease blend for moisture protection.
- **Integrated sponge:** Built-in applicator for even, quick spreading.
- **Instant shine:** Restores gloss and evens finish on smooth leather.
- **Multi-use:** Suitable for shoes, boots, bags and other leather accessories.
- **Compact size:** 100 ml jar—easy to carry and store.
- **Leather care:** Helps condition leather and reduce signs of wear.

How to use / When it’s useful

Quick answer: Clean the leather, apply small amounts with the included sponge, let dry, then buff for a shine. Use on clean, dry leather for best results.

In most cases, apply before expected wet conditions or as regular maintenance after cleaning. This cream is useful for daily shoes, field or tactical boots, duty gear, and leather bags to add water resistance and restore appearance.

Care and notes

Store and use the cream following basic leather-care precautions to keep the product effective and avoid unwanted effects on delicate finishes.

- Always test on a hidden area first, especially on suede, nubuck or very light-coloured leather.
- Keep the jar closed and store in a cool, dry place away from direct sunlight.
- Apply sparingly on heavily soiled or damaged leather; clean first and let fully dry before treating.
- May require periodic reapplication depending on use and weather exposure.

FAQ

Q: How long does the waterproof effect last?

A: The water-repellent effect typically lasts several weeks, depending on wear, surface type and

weather conditions. High exposure will require more frequent reapplication.

Q: Is this cream suitable for all types of leather?

A: It is designed for most smooth leathers and many leather accessories. For suede and delicate finishes, do a patch test first to check for colour or texture changes.

Q: Can I use it on bags, belts and other leather accessories?

A: Yes. The cream works on shoes, boots, bags and similar leather items to protect and improve appearance when applied correctly.

Q: Will the cream leave residues or stains?

A: When applied and buffed properly, the cream absorbs into the leather and should not leave noticeable residue. Test on a small area if concerned about staining on light-coloured items.

Q: How should I store the product?

A: Keep the jar tightly closed in a cool, dry place away from direct sunlight to preserve the formula and prevent spoilage.

Q: How do I apply for best results?

A: Clean and dry the leather first, then spread a thin, even layer with the included sponge. Allow to dry, then buff to the desired shine.

Tip: Choose the right quantity for your needs (this jar is 100 ml) and test on a hidden area for delicate leathers; browse related leather care items and brushes to build a complete maintenance kit for tactical, military surplus, duty and police footwear.
