Product features:

Product short description:

Personal defense spray for civilians, security professionals, and anyone seeking a convenient non-lethal self-defense option. Intended for short-range use to temporarily deter an attacker and provide time to retreat.

- **Use:** For immediate personal protection in close encounters; designed to create a window to escape rather than to cause lasting harm.
- **Type:** Handheld defense spray with simple point-and-spray operation suitable for quick deployment.
- **Portability:** Compact form factor designed to carry in a pocket or bag for everyday use.
- **Safety:** Observe local laws and follow the included instructions for handling, storage, and responsible use.

Product description:

Product overview

This Pepper Personal Defense Spray is a compact, portable self-defense tool designed for

people who want quick, short-range protection in unexpected situations. Definition: a 15 ml oily pepper (oleoresin capsicum) spray formulated to create temporary eye and respiratory irritation to allow escape.

Ideal for everyday personal defense and for users in tactical, security or police-related roles who need a small, easy-to-carry deterrent. Availability is limited, so consider adding the item to your cart if you need a reliable personal defense option.

Main features

Built for immediate deterrence and easy carry, this pepper spray offers a balance of power and portability.

- **10% oily pepper formula** (oleoresin capsicum base) for effective irritation.
- **800,000 Scoville** spiciness rating for strong deterrent effect.
- **15 ml compact bottle** — fits in a bag or pocket for everyday carry.
- **Effective range up to 2.5 meters** to help maintain distance from an aggressor.
- **Temporary irritating effect** on eyes and airways, intended to allow safe withdrawal.
- **Designed to avoid permanent injury** when used as directed.

How to use / When it’s useful

Use this spray only in situations of real threat to deter an attacker and create an opportunity to escape. After deploying the spray, move away from the contaminated area and seek help from public safety authorities if needed.

Quick answer: Aim for the face from a safe distance (up to 2.5 m) and then leave the scene. In most cases, the spray’s temporary effects give enough time to reach a safe place and call for assistance.

Care and notes

Store and handle the spray responsibly to ensure safety and effectiveness.

- Keep in a cool, dry place away from heat sources and direct sunlight.
- Sale prohibited to persons under 16 years of age.
- If accidental contact occurs, rinse eyes immediately with plenty of water and wash skin with soap.
- Use only in legitimate self-defense situations and follow local laws and regulations.
- Check airline and transport rules before attempting to carry on flights.

FAQ

Q: How long does the spray’s effect last?

A: The irritating effect is temporary and usually lasts between 15 and 30 minutes, enough time to distance yourself from the threat and seek help.

Q: Is this pepper spray legal?

A: Yes, it is legal for civilian use in many areas, but it must be used only in real self-defense situations and according to local laws. Check your local regulations before purchase.

Q: How should I store the spray?

A: Store in a cool, dry place away from children and heat sources. Keep the cap secured and inspect periodically for damage or leaks.

Q: Can I take the spray on an airplane?

A: Air transport rules vary by airline and country. Most airlines prohibit carrying pepper spray in cabin luggage or checked baggage. Always verify with the airline before travel.

Q: Could the spray cause permanent damage?

A: The product is designed to cause temporary irritation to eyes and airways and not to produce permanent injury when used as directed. Misuse, direct prolonged exposure, or use on vulnerable individuals can increase risks.

Q: What should I do after using the spray?

A: Move away from the contaminated area, seek a safe location, and contact public safety authorities if necessary. If you or others were exposed, follow first-aid steps such as flushing eyes with water.

Tip: Choose the right size and carry option for your daily routine — check small, pocket-size variants for everyday carry or larger options if you need longer use. Browse related personal defense and tactical items to complete your safety kit.
