How to use / When it's useful

Quick answer: mount the nastrino on a ribbon bar or portanastrino using the chosen clamp or screw attachment to match your uniform or display. The ribbon fits standard two-slot or multi-slot metal bases when installed on a portanastrino.

In most cases, choose the 37 mm size for wider, more visible displays and 20 mm for compact or mixed-ribbon mounts. The Elite (slightly domed) variant is useful when you want a more pronounced profile on a dress uniform or display case.

Care and notes

Keep the ribbon in good condition by storing it dry and handling it with clean hands; select the mounting option that matches your ribbon bar for a secure fit.

- Store flat or on a suitable portanastrino to avoid creasing.
- Do not machine wash; clean gently by hand if needed and let air dry.
- Choose clamp or screw attachments according to your ribbon bar type for safety.
- Availability may be limited due to demand from collectors and service personnel.
