Product short description:

Universal Radio Carrier (Vegetato) is a lightweight, camouflaged radio pouch designed for outdoor enthusiasts and field professionals. It provides secure, accessible storage for handheld radios while blending with natural surroundings.

- **Material:** Made from durable, high-quality materials for reliable use in the field.
- **Protection:** Keeps your radio secure and protected while allowing quick access when needed.
- **Fit:** Universal design with adjustable straps for a comfortable, personalized carry.
- **Use:** Compact and lightweight—ideal for hiking, camping and tactical operations.
- **Camouflage:** Vegetato pattern integrates naturally with outdoor environments.

Product description:

Product overview

The Porta Radio Universale Vegetato is a compact, MOLLE-compatible radio pouch designed for outdoor, tactical, and field users who need secure, hands-free radio carry. Definition: a vegetato-

camouflage radio pouch that holds handheld transceivers and attaches to MOLLE webbing.

Made from durable 1000D polyester with a rear drainage hole, it is suited for tactical, military surplus, and police equipment use where quick access and secure retention are required. Lightweight and low-profile, it fits radios with bodies from 16 cm to 20 cm (antenna excluded).

Main features

Key features for secure, versatile radio carry:

- **Vegetato camouflage** for natural-area concealment.
- **M.O.L.L.E. system with double buckle** for attachment to backpacks, vests, and belts.
- **Retention elastic and adjustable cord** to keep the radio stable during movement.
- **Internal flap with Velcro** to adjust fit for smaller transceivers.
- **Rear drainage hole** to let water escape and reduce moisture buildup.
- **Durable construction** in Polyester 1000D; external size 13 cm H x 9 cm L x 4 cm P; weight 85 g.

How to use / When it’s useful

Slide your handheld radio into the pouch, secure the internal Velcro flap and tighten the retention cord. Attach the pouch to any MOLLE-compatible platform using the double-buckle straps for a stable fit.

Quick answer: It fits most handheld radios with a body length between 16 cm and 20 cm (antenna excluded). In most cases, users on patrol, fieldwork, or outdoor training will find it keeps radios accessible and secure while reducing bulk.

Care and notes

Simple care keeps the pouch functional and durable in the field.

- Hand wash or gentle machine wash; air dry to protect fabric and Velcro.
- Do not rely on it as a waterproof case—drain hole helps moisture escape but does not fully prevent water ingress.
- Check fit before use: pocket opening and max adjustable depth affect compatibility (see specs below).
- Avoid prolonged exposure to sharp edges or chemicals that can damage 1000D polyester.

FAQ

Q: What radio sizes does the pouch accept?

A: The pouch fits radio bodies from 16 cm up to 20 cm in length (antenna excluded). The internal

flap and adjustable cord allow a snug fit for smaller devices.

Q: Is the M.O.L.L.E. system compatible with my vest or backpack?

A: Yes. The double-buckle M.O.L.L.E. system is designed to attach to most standard MOLLE webbing on vests, packs, and belts.

Q: Is the pouch waterproof?

A: No. It has a rear drainage hole to let water escape and help keep the radio dry in damp conditions, but it is not a sealed waterproof case.

Q: What are the pouch dimensions and weight?

A: External dimensions are 13 cm H x 9 cm L x 4 cm P. The pouch weighs approximately 85 grams.

Q: What material is the pouch made from?

A: The pouch is constructed from durable Polyester 1000D, chosen for abrasion and weather resistance common in tactical and military surplus gear.

Q: Can the pocket opening and depth fit different radio shapes?

A: The pocket opening measures up to 5 x 5 x 5 cm with a maximum adjustable depth of 9 cm, and the internal Velcro flap helps adapt to various radio profiles.

Tip: Choose the right pouch by measuring your radio (exclude the antenna) and compare to the listed dimensions; consider browsing related tactical and police gear items to complete your setup.
