- **Fit:** Secure side carry; confirm compatibility with your PX4 variant before purchase

Product description:

Product overview

Vegatek Guardian holster is a duty-grade holster built for police and law enforcement,

developed to combine secure retention with fast, reliable draw. It is designed for officers, Guardia di Finanza personnel and other professional users who need a durable, operational holster.

Definition: The Vegatek Guardian is a Kydex thermoformed holster with integrated retention systems for safe carry and quick access.

Main features

Solid construction and dual retention make this holster suitable for tactical and duty use.

- **VEGATEK Kydex thermoformed** body — lightweight, impact and weather resistant.
- **Internal lining** to protect the firearm finish, especially suited for Beretta PX4.
- **Vega Push Down** mechanical lock for secure retention during movement.
- **Vega Automatic Push and Go** for a single-motion, rapid extraction when needed.
- Compatible with optional protection kits: **APG art. 8K70** and **PD art. 8K71**.
- Available in white for the PX4 Guardia di Finanza and in versions for other pistol models (see codes below).

How to use / When it’s useful

The Vegatek Guardian is useful for patrol work, interventions and any situation where secure carry and a fast draw are required. The dual retention lets you keep the weapon locked during activity yet accessible in one controlled movement.

Quick answer: use the Push Down lock for secure carry; press the release and draw with the Push and Go action for speed. In most cases, match the holster code to your pistol model to ensure a correct fit and reliable retention.

Care and notes

Basic care keeps the holster performing and protects your firearm finish; follow these practical notes before use.

- Check fit: verify the correct model code before ordering (see list below).
- Keep clean and dry; wipe with a damp cloth and mild soap if needed.
- Inspect retention and mounting hardware regularly for wear or loosening.
- Use optional APG (8K70) or PD (8K71) kits for extra protection in high-risk situations.
- Follow local laws and departmental rules when carrying a loaded weapon.

FAQ

Q: Which pistols fit this holster?

A: The Guardian is available for the Beretta PX4 Guardia di Finanza and several other models

listed by code. Confirm the correct code for your pistol before purchase.

Q: What is the holster made of?

A: The body is made from VEGATEK Kydex thermoformed material, chosen for its durability, light weight and resistance to impact and weather.

Q: How do the Vega retention systems work?

A: Vega Push Down locks the pistol in place until deliberately released; Vega Automatic Push and Go allows a rapid, single-motion draw once released.

Q: Are there accessories available?

A: Yes. Optional kits include the Kit di protezione sicura APG (art. 8K70) and the Kit PD (art. 8K71) to increase protection and anti-tamper security.

Q: What colour and variants are offered?

A: The PX4 Guardia di Finanza version is available in white. Other pistol-specific variants are available—order by the product code for each model.

Q: How do I order the correct variant?

A: Select the Vegatek Guardian and enter the required article code in the order communications box at checkout to request the specific model.

Tip: Choose the correct code for your pistol model (VKG800, VKG802, VKG804, VKG807, VKG808, VKG846, VKG860) and consider the APG or PD protection kits if you need extra security; also browse related tactical and duty holsters to compare fit and features before finalizing your purchase.
